PREFACE

This Dictionary has been written with the view of providing a thoroughly practical and reliable hand-book to all classes of cookery.

The recipes are the result of practical knowledge, and precise directions have in every instance been given.

The difficulty of readily finding the particular recipe required I have minimised as far as possible in the present work by the addition, at the end of the volume, of an index of all the recipes, arranged under the different courses. The recipes themselves are in alphabetical order.

The question of time required for cooking each particular dish is one to which particular attention has been given. I have indicated as nearly as possible the exact number of minutes required, and, in the case of baking, whether the time given applies to a quick or a slow oven.

I have also endeavoured to give an idea of the number of people the quantities stated would suffice for. It will be observed that nearly all the recipes suitable are calculated for small families of four or five. Some of these would remain the same for two persons—as, for instance, small joints, one fowl, etc.—but of many, the ingredients could be safely halved. For larger families every housekeeper would naturally use her judgment and experience. In some cases the ingredients would need to be doubled for eight persons, whilst in others half as m
again would suffice. In buying a *joint* of beef, mutton, or veal, one usually wishes to have something substantial to cut from, so more is allowed for each person than of dishes such as steaks, cutlets, etc.

Such economy as is consistent with the preparation of really palatable dishes has been carefully studied, but I have not given the supposed cost, since prices vary so widely according to locality and season, that it is impossible for an exact estimate to be made.

A PRACTICAL DICTIONARY OF COOKERY

An Index of all the Recipes, here arranged in Alphabetical Order, will be found at the end of the Volume arranged under the different Courses.

No. 1.—ABERNETHY BISCUITS.

Ingredients—
1 lb. flour, 1 oz. butter, 1 oz. sugar, 
\( \frac{1}{2} \) oz. carraway seeds, 1 egg, 2 or 3 tablespoonfuls milk.

Method—
Mix the flour and sugar together, and rub in the butter. Add the carraway seeds, and mix them well in. Beat and strain the egg, and add it to the mixture with just sufficient milk to make a stiff dough. Turn the paste on to a floured board, and roll it out to \( \frac{1}{4} \) inch thickness. Stamp it out with a round cutter 4 or 5 inches in diameter. Prick each biscuit with a fork, lay them on a baking tin slightly buttered, and bake in a moderate oven to a nice light brown.

Time—20 to 30 minutes.

Sufficient for 7 or 8 biscuits.

No. 2.—ACIDULATED DROPS.

Ingredients—
1 lb. fine loaf sugar, \( \frac{1}{2} \) pint water, 1 dessert-spoonful lemon juice.

Method—
Boil the sugar and water until the syrup is very thick, then add the lemon juice, and boil again until a little of the syrup dropped into cold water will set and crack between the teeth. Oil a large tin, and as soon as the syrup is ready, drop it in very small quantities with a spoon on to the tin, and set it aside (on ice if possible) for the drops to harden. Put them into a clean cloth to absorb any oil which might remain, dust icing sugar over them, and put away in glass jars.

Time—20 to 30 minutes.
No. 3.—ALMONDS (To Blanch).

Put the almonds in a small basin, pour sufficient boiling water on them to cover them, and leave for 15 or 20 minutes. Then take out the almonds, and the skins will come off quite easily. Dry them on a clean cloth.

No. 4.—ALMOND CAKE.

Ingredients—
6 eggs, 4 oz. pounded sweet almonds, ½ oz. pounded bitter almonds, 6 oz. sifted sugar, 6 oz. flour, 6 oz. butter, finely grated rind of 1 lemon.

Method—
Whisk and strain the eggs, mix them with the almonds and sugar, and sift in the flour, beating constantly all the time. Then add the butter, which must be melted, but not hot, a small portion at a time, beating very thoroughly as each portion is added, and lastly the lemon rind. Line a cake tin with buttered paper, and rather more than half fill it with the mixture.

Bake the cake in a well-heated oven, covering the top with a buttered paper when sufficiently coloured. Test it with a small skewer or knife in the usual way.

Time—About 1 hour.

No. 5.—ALMOND CAKES (Small for Afternoon Tea).

Then add the butter, which must be melted, but not hot, a small portion at a time, beating very thoroughly as each portion is added; lastly add the lemon rind, and beat all well together.

Bake some patty pans, and rather more than half fill each with the mixture. Bake in a well-heated oven, taking care that they are nicely browned but not burnt.

Time—20 to 30 minutes.

Sufficient for 12 small cakes.

Method—
Whisk and strain the eggs, beat in the almonds and sugar, add the butter, which must be melted, but not hot, and the lemon juice, and beat the mixture for five minutes. Line 12 patty pans with the paste made as directed above; put some of the mixture into each, and bake in a quick oven.

Time—About 15 minutes.

Sufficient for 12 cheese cakes.

When ready, mix it gradually with the pounded almonds, strain all through a fine sieve, and set aside to cool. Whip the cream to a stiff froth, and add the custard, which should be lukewarm, by degrees, beating it thoroughly together. Stir well, and pour into a mould wetted in every part with cold water, and set aside on ice or in a cool place to stiffen.

*Time*—15 to 25 minutes.

No. 17.—ANCHOVIES (To Choose and Prepare).

For all savouries, and for the garnishing of mayonnaise, etc., anchovies in oil are much to be preferred to those preserved in brine. They should be taken out of the bottle with a fork, unrolled and laid on kitchen paper, so that the superfluous oil may be absorbed before they are used.

Anchovies preserved in brine should be soaked in milk for 2 hours, then laid on a clean cloth, and lightly dried.

No. 18.—ANCHOVIES (To Fry).

8 or 10 anchovies, a little flour.

Wipe the anchovies as free as possible from oil, and remove all the bones. Pound them in a mortar until they are reduced to a smooth paste, then add the butter and pepper, and continue pounding until the ingredients are thoroughly mixed. Then rub the whole through a fine hair sieve, and set it aside (if possible on ice) to harden. When it has become firm, make it into small rolls with the butter pats, arrange these on a small dish, garnish with parsley, and serve.

*Sufficient for* \( \frac{1}{2} \) lb. butter.

No. 20.—ANCHOVY EGGS.

*Ingredients*—

4 eggs, 1 table-spoonful anchovy paste, seasoning cayenne pepper.

*Method*—

Boil the eggs hard, and set them
aside to become quite cold. Then shell the eggs, and cut a little piece off each end so that they will stand. Cut them in halves, and remove the yolks, which should be pounded together with the anchovy paste, and a sprinkling of cayenne.

Re-fill each half egg with the mixture, and stand them on small squares of toast, freshly buttered, and not too thin, or on croûtons freshly fried.

Serve cold, garnished with parsley or small cress.

**No. 27.—APPLES (To Choose).**

Cooking apples should be chosen of a firm kind, particularly if they are intended to be served whole, either simply baked, in a compôte, or as dumplings.

For ordinary purposes the Blenheim Orange is hard to beat. Pearmain and Nonsuches are both good. Later in the season Warner’s King is an excellent apple, and Bramley’s Seedling is of good flavour and serviceable for use at the end of the winter. For apple jelly, Nonsuches are considered the best, but any good cooking apple of fine flavour will make a good preserve. For dessert Ribston Pippins, Russet apples, and Cox’s Orange Pippins are the most easily obtainable. The apples should be thoroughly polished with a clean cloth before being placed on the table.

**No. 28.—APPLES BAKED (Plain).**

**Method**—
Choose some rather hard cooking apples. Polish them with a clean cloth, and place on a baking tin. Cook in a moderate oven, and serve hot with moist sugar as well as sifted.

**Time**—About 40 minutes.

**Sufficient**—allow 6 apples for 4 or 5 persons.

**No. 29.—APPLES (Compôte of).**

**Ingredients**—
6 apples, juice of 1 lemon, ½ lb. sugar, ½ pint water.

**Method**—
Boil the sugar, water, and lemon juice together for 15 minutes. Pare the apples, halve them and remove the cores, lay them in the syrup, and boil gently until they are tender. **Time**—To cook apples, about 30 minutes.

To boil syrup, 10 minutes.

**Ingredients**—
6 Russet apples, 4 oz. sugar, the juice of ½ a lemon, ½ pint water.

**Method**—
Put the water, sugar, and lemon juice into a stewpan and boil them for 10 minutes. Pare and core the apples without dividing them, arrange them in a single layer in the stewpan, and simmer them gently until quite tender, but be careful not to overcook them or they would break. When done lift them out very carefully, and arrange them in a glass dish. Boil the
syrup briskly for a few minutes. Let it cool, then strain it over the apples.  
**Time**—To stew apples, about 40 minutes.  
To boil syrup, 5 to 10 minutes.

**Method**—
Pare and core 8 of the apples without dividing them. Put the 8 oz. sugar, the lemon juice and water, into a saucepan, and boil them for 5 minutes. Then lay in the apples, and cook them until quite tender. Lift them out and arrange them in a mound on a glass dish. Pare, core, and slice the remaining apples and stew them in the syrup until the whole forms a smooth marmalade. Fill up the spaces between the apples with this and set them aside to cool. When cold, beat the whites of the eggs to a very stiff froth, stir in the castor sugar rapidly, and cover the apples all over with the mixture.

**Time**—To cook apples, about 40 minutes.  
To make the marmalade, about 20 minutes.

8 Russet apples, 4 oz. sugar, the juice of \( \frac{1}{2} \) a lemon, \( \frac{1}{2} \) pint water, \( \frac{1}{2} \) oz. isinglass, about 10 drops cochineal.

**Method**—
Put the sugar, water, and lemon juice into a stewpan and boil them for 10 minutes. Pare and core the apples without dividing them; arrange them in a single layer in the stewpan, and simmer them gently until quite tender. Then take them out carefully, and arrange them in a glass dish. Put the isinglass into the syrup and boil it briskly for 5 minutes, stirring occasionally. Put the remainder in a lined saucepan, and heat it gently until it is just melted, then put in the apples in a single layer, and cook them very gently until they are tender, turning them when about half done. When they are very nearly cooked, sift on to them the sugar, which they should absorb at once, and cook them for 5 minutes longer. Make the jam quite hot in a small saucepan. Lift out the apples on to a very hot dish, put some of the hot jam in each, pour the butter remaining in the stewpan round them, and serve immediately.

No. 43.—APPLE DUMPLINGS (Very Fine).

**Ingredients**—
6 apples, 2 table-spoonfuls apricot jam. Paste No. 403, made with \( \frac{3}{4} \) lb. flour, and the other ingredients in proportion.

**Method**—
Pare and core the apples without dividing them. Cut the paste into 6 pieces of equal size. Roll out a piece until it is about 6 inches square, and round off the corners with your knife. Put one of the apples on it, filling the cavity in the fruit with the jam. Close the paste carefully over, just moistening the joins with a very little water to make them stick. Turn the dumpling upside down on to a baking tin, so that the top is smooth and round, and the joins of the paste come at the bottom. Proceed in exactly the same manner until all the dumplings are made. Bake them in a moderate oven for about \( \frac{1}{2} \) an hour. The apricot jam imparts a delicious mellowness to the apples, and renders the addition of sugar unnecessary.

**Time**—30 to 35 minutes.

**Sufficient for 6 dumplings.**

No. 44.—APPLE DUMPLINGS (Boiled).

**Ingredients**—
6 apples, 2 table-spoonfuls marmalade, Crust No. 404, made with \( \frac{3}{4} \) lb. flour, and other ingredients in proportion.

**Method**—

Divide the paste into 6 equal portions, and roll each out until of sufficient size to enclose an apple. Pare and core the apples without dividing them. Place them in the centre of the pieces of paste. Fill the cavities with marmalade, and fold the paste neatly round the apple. Tie each separately in a small, very clean cloth, and put them into boiling water. Serve very hot with sifted sugar handed round.

**Time**—45 minutes.

**Sufficient for 5 or 6 persons.**

No. 45.—APPLE FRITTERS.

**Ingredients**—
3 or 4 large apples, batter No. 123, some sifted sugar, fat for frying.

**Method**—

Prepare the batter two or three hours before it is required, and set it aside in a cool place.

Pare and core the apples, and cut each one into 4 or 5 thick slices. Dip the slices one by one into the batter, and see that they are perfectly coated,
then arrange in a frying-basket. Have ready sufficient boiling fat to cover them, into which plunge the basket, and leave it until the fritters are a nice brown.

Take them up and lay them on kitchen paper to absorb the grease. Then sprinkle with sifted sugar, and serve very hot.

*Time*—About 5 minutes.

*Sufficient for* 12 or 15 fritters.

**No. 46.—APPLE JAM.**

*Ingredients—*

6 lbs. apples, 3½ lbs. preserving sugar, strained juice of 2 lemons.

*Method—*

Pare, core, and slice the apples. Put them in a large jar, and stand this in a saucepan of boiling water. Stew the apples in this way until they are quite tender, then turn the fruit into a preserving-pan, add the sugar, broken into small lumps, and set it over the fire. Stir occasionally until all the sugar is melted, then boil rapidly for 25 minutes, stirring constantly, and removing all scum as it comes to the surface. Put in the lemon juice, boil for another 5 minutes, try a little jam on a plate, and as soon as it sets pour into pots at once.

*Time*—To stew apples, 2½ to 3 hours. To simmer jam, about 30 minutes.

*Sufficient for* 8 lbs. of jam.

**No. 47.—APPLE JELLY.**

*Ingredients—*

9 lbs. apples, 4 quarts water, 4½ lbs. sugar, the strained juice of 3 lemons.

*Method—*

Pare, core, and quarter the apples. Put them in a preserving-pan with the water, and boil together until the fruit is quite tender, and forms a smooth, but not thick, pulp. Strain this through a jelly-bag or fine sieve, and, should the juice not look clear, strain a second time.

Return the juice to the saucepan, and boil it rapidly for 20 minutes, add the sugar, and continue boiling for 15 minutes, stirring all the time, and removing carefully any scum which may arise from the sugar. Add the lemon juice, and boil for another 5 minutes, or until a little of the jelly, poured on a plate, will set.

*Time*—To cook apples, about 45 minutes.

To boil juice, altogether about 40 minutes.

*Sufficient for* 6 lbs. of jelly.

**No. 48.—APPLE JELLY (Mould of).**

*Ingredients—*

2 lbs. apples, 1 quart cold water, 1 oz. isinglass, the juice of 2 lemons, the rind of 1, the whites and shells of 2 eggs, 5 oz. sugar.

*Method—*

Put the water in a lined saucepan. Pare, core, and quarter the apples, and throw them, as they are done, into the saucepan, to prevent them becoming discoloured. Boil them very gently for about ⅔ of an hour, until quite tender, taking care to reduce the juice as little as possible. Turn the apples into a jelly-bag, and strain the juice from them without pressure; it will take some time to run through. Put the strained juice in a fresh saucepan, with the isinglass, sugar, lemon juice, and rind, and the whites and shells of the eggs. Bring all to boiling point, stirring occasionally; take out the spoon and let simmer for 10 minutes, then strain again through the jelly-bag. If the jelly does not look quite clear and bright, strain a second time. Pour into a wetted mould, and set aside to become firm.

*Sufficient for* 1½-pint mould.

**Method—**

Halve and stone the apricots; put them in a deep dish, and strew the sugar on them. Let them remain all night. In the morning turn the fruit and sugar into a preserving-pan, and let them simmer until the fruit is tender. They must not be allowed to boil, or the fruit will mash.

When they are done, turn them into a basin, and set them aside in their syrup for three days. Then carefully lift out the apricots, drain them, and set them on a dish, taking care not to let them touch each other until quite dry.

**Time**—To simmer the apricots, 6 to 10 minutes.

**No. 61.—APRICOT CHARLOTTE.**

**Ingredients—**

12 Savoy biscuits, the white of 1 egg, 6 apricots, ½ pint water, ½ lb. sugar, ½ oz. isinglass, ½ pint cream.

**Method—**

Make a case of sponge finger biscuits, as directed for Charlotte Russe in Recipe No. 296. Peel, halve, and stone the apricots, and stew them with the sugar and water until they are sufficiently tender to rub through a sieve. Melt the isinglass in the smooth, thick syrup thus produced, and set it aside to cool. As soon as the syrup is cool, and before it begins to set, add it to the cream (which should be whipped as stiffly as possible), a spoonful at a time, beating well together. Continue beating for 3 or 4 minutes—in summer,
over ice if possible. Pour the mixture into the Charlotte mould, and set it aside in a cool place to stiffen.

Tinned apricots may be used for this recipe. They will probably not require to be boiled: a \(\frac{1}{2}\) pint of their syrup should be made hot in a small saucepan, and the isinglass melted in it. This should be poured on the apricots, and the whole passed through a sieve, after which proceed exactly as above.

**Time**—To stew apricots, 20 to 30 minutes.

*Sufficient for 1\(\frac{1}{2}\)-pint mould.*

---

**No. 62.—APRICOT CREAM.**

**Ingredients**—

8 apricots, 6 oz. sugar, 1 tablespoonful water, juice of \(\frac{1}{2}\) a lemon, \(\frac{3}{4}\) pint milk, 3 eggs, \(\frac{3}{4}\) oz. isinglass, \(\frac{1}{4}\) pint cream.

**Method**—

Cut the apricots into quarters, and put them with the sugar, lemon juice, and water into a lined saucepan, cook them until very tender, then rub them through a fine sieve with a wooden spoon. Soak the isinglass in the milk for 5 minutes, and then heat the milk until the isinglass is quite dissolved. Beat and strain the eggs, add to them the hot milk, and return all to the saucepan. Stir over the fire until it has thickened as for custard, then mix it with the apricots; rub the mixture through a fine sieve, and set it aside until it is lukewarm. Then whip the cream to a stiff froth, add the custard by degrees, and continue beating until they are perfectly mixed. Pour the cream into a well-wetted mould, and put it in a cool place to become firm.

**Time**—To cook apricots, 20 to 30 minutes.

To boil custard, 10 to 15 minutes.

Put them in plenty of fast-boiling water and cook them for 30 minutes. Then lay them on a cloth to drain. Put the oil and wine into a small stewpan and make them hot. Chop the onion and mushroom into very small pieces, and cook them for 4 or 5 minutes in the oil and wine. Then lay in the pieces of artichoke, cover with the stock, and simmer gently over the fire for about 30 minutes until a leaf can be easily pulled out. When ready lift them into a very hot dish. Mix the arrowroot with a tablespoonful of cold stock or water, stir it into the hot stock, and continue boiling for 2 or 3 minutes until the gravy is sufficiently thickened. **No. 94.—ASPARAGUS (Boiled).**

**Ingredients**—

50 heads asparagus, \( \frac{1}{2} \) gallon water, 
1 tablespoonful salt.

**Method**—

Scrape the white part of the stems, and cut all the stalks to an even length. Put them to soak in cold water for \( \frac{1}{2} \) an hour. Then tie them into 3 or 4 bundles, keeping the heads all one way. Put them into boiling water, salted in above proportion, and let them cook quickly until tender. Do not cover the saucepan. As soon as the asparagus is done, take it up carefully and dish it upon toast, which should be lightly dipped in the water the asparagus was cooked in. Untie the bundles, and lay the asparagus with the heads all one way.

Serve clear melted butter No. 228 separately in a boat.

**Time**—15 to 20 minutes.

**Sufficient for 4 or 5 persons.**

**No. 95.—ASPARAGUS COLD à la CRÈME.**

**Ingredients**—

50 heads asparagus, \( \frac{1}{2} \) pint cream.

**Method**—

Boil the asparagus by Recipe No. 94, and set it aside to cool. When cold, place the dish it is in on ice for at least an hour. Have the cream also on ice for the same length of time.

Half an hour before serving arrange the asparagus neatly in an oval glass dish. Whip the cream until it is thick, but not stiff, pour it over the green tips of the asparagus, being careful that none is spilt on the white parts of the stalks. Replace the dish on the ice until it is required, then dry the dish on a clean cloth, and send to table as cold as possible.

**Sufficient for 5 or 6 persons.**

---

**No. 96.—ASPARAGUS TINNED (To Use).**

Tinned asparagus must on no account be warmed. It should be lifted out of the tin into a shallow pie-dish filled with cold water, left to soak for 10 or 15 minutes, and then carefully drained. It should then be laid in the dish in which it is to be served, and, if possible, put on ice for 2 or 3 hours before it is sent to table.

Care must be taken in handling it as the points are very easily broken off. Mayonnaise sauce, No. 784, or sauce Argenteuil, should be served separately in a boat.

---

**No. 97.—ASPARAGUS POINTS (Dressed as Peas).**

**Ingredients**—

50 heads young asparagus, 1 quart water, 1 tea-spoonful salt, 1 oz. butter, seasoning pepper and salt.

Have ready a saucepan of fast-boiling water, throw in the asparagus points with a tea-spoonful of salt, and boil them until quite tender. Drain them well, then return them to the saucepan with 1 oz. butter and a seasoning of pepper and salt. Shake them round until the butter is melted, but do not put them on the fire again. Turn them into a very hot
dish, and serve immediately. This is a good way of dressing asparagus when the heads are too small to present a good appearance served whole.

**Time**—10 to 15 minutes.

**Sufficient for 4 or 5 persons.**

**No. 102.—ASPIC.**

**Ingredients—**

1 calf's foot, ½ lb. beef, ½ lb. knuckle of veal, 4 oz. ham, 1 carrot, 1 small onion, ½ tea-spoonful salt, 10 peppercorns, a sprig of parsley, 1 oz. butter, 1 quart cold water. For clearing, the whites and shells of 2 eggs.

**Method—**

Chop the ham and onion into small pieces, put them with the butter in a stewpan, and let them fry for 3 minutes. Cut up the beef and veal into small pieces, slice the carrot, and add these with the seasonings to the ham. Cut the calf's foot into 5 or 6 pieces and put it in the stewpan. Pour in the water and let the stock come slowly to the boil. Draw the pan aside and simmer gently for 4 hours, then strain through a sieve and set aside for some hours to become quite firm. Then take all the fat off the jelly with a spoon, and put the stock in a saucepan over a gentle fire. As soon as it is melted add the whites and crushed shells of 2 eggs, which should first be lightly beaten in a basin with a table-spoonful of cold water. Bring it to a boil, stirring occasionally until it simmers, but not afterwards. Let it simmer for 8 minutes untouched. Strain it through a jelly-bag, or fine cloth, and as soon as set it is ready for use. It should be as clear as sherry.

Many small things are set in aspic, for which directions will be found under their headings. If the aspic is required simply for garnishing, it should be poured into a slightly-buttered shallow dish whilst still liquid. When set it should form a layer ¼ inch thick, which can be cut into croutons and fancy shapes, and may be appropriately used for garnishing almost all cold luncheon and supper dishes. If desired ¼ a wine-glass of good vinegar may be added just before the stock is cleared.

**No. 103.—BACON (Boiled).**

**Ingredients—**

2 to 3 lbs. of back of bacon, water.

**Method—**

Soak the bacon in warm water for 2 hours. Then scrape the under side and rind as clean as possible. Put it in a saucepan, cover it with cold water, and bring it to the boil. Remove all scum as it rises, and let it simmer very gently until thoroughly cooked. Take it up, strip off the skin, and sprinkle thickly with sifted bread raspings. Serve immediately.

When cold this forms an excellent breakfast dish.

**Time**—About 2 hours.

**Sufficient for** 5 or 6 persons.

**No. 104.—BACON (Broiled Rashers of).**

**Ingredients—**

6 or 8 rashers of bacon.

**Method—**

Cut the bacon into rather thin rashers, arrange them on the gridiron, and broil them carefully in front of, rather than over, a very clear fire.

Where a gas-cooker is used this dish can be cooked to perfection under the grill or toaster, but care must be taken not to let the bacon burn. Turn each rasher constantly, and dish as soon as cooked on a very hot plate.

**Time**—3 to 5 minutes.

**Sufficient for** 4 or 5 persons.
No. 105.—BACON (To Cure and Keep Free from Rust—Cobbett’s Recipe).

"The two sides that remain, and which are called flitches, are to be cured for bacon. They are first rubbed with salt on their insides, or flesh sides, then placed one on the other, the flesh sides uppermost, in a salting-trough, which has a gutter round its edges to drain away the brine, for, to have sweet and fine bacon, the flitches must not be sopping in brine, which gives it the sort of vile taste that barrel and sea pork have. Every one knows how different is the taste of fresh, dry salt from that of salt in a dissolved state. Therefore change the salt often—once in four or five days—let it melt and sink in, but not lie too long; twice change the flitches, put that at the bottom which was first on top. This mode will cost you a great deal more in salt than the sopping mode, but without it your bacon will not be so sweet and fine nor keep so well. As for the time required in making your flitches sufficiently salt, it depends on circumstances. It takes a longer time for a thick than a thin flitch, and longer in dry than in damp weather, or in a dry than in a damp place; but for the flitches of a hog of five score (a score is a weight of 20 lbs.), in weather not very dry or damp, about six weeks may do; and as yours is to be fat, which receives little injury from over-salting, give time enough, for you are to have bacon until Christmas comes again. The place for salting should, like a dairy, always be cool, but well ventilated; confined air, though cool, will taint meat sooner than the mid-day sun accompanied by a breeze. With regard to smoking the bacon, two precautions are necessary. First, to hang the flitches where no rain comes down upon them; and next, that the smoke must proceed from wood, not peat, turf, or coal. As to the time required to smoke a flitch, it depends a good deal upon whether there be a constant fire beneath, and whether the fire be large or small. A month will do if the fire be pretty constant and rich, as a farmhouse fire usually is; but over-smoking, or rather too long hanging in the air, makes the bacon rust; great attention should therefore be paid to this matter. The flitch ought not to be dried up to the hardness of a board, and yet it ought to be perfectly dry. Before you hang it up, lay it on the floor, scatter the flesh side pretty thickly over with bran, or with some fine sawdust (not of deal or fir); rub it on the flesh, or pat it well down upon it. This keeps the smoke from getting into the little openings, and makes a sort of crust to be dried on. To keep the bacon sweet and good, and free from hoppers, sift fine some clean and dry wood ashes. Put some at the bottom of a box or chest long enough to hold a flitch of bacon. Lay in one flitch, then put in more ashes, then another flitch, and cover this with 6 or 8 inches of the ashes. The place where the box or chest is kept ought to be dry, and, should the ashes become damp, they should be put in the fire-place to dry, and when cold put back again. With these precautions the bacon will be as good at the end of the year as on the first day."

No. 106.—BACON AND EGGS.

Ingredients—
8 or 10 rashers of rather lean back of bacon, 6 eggs.

Method—
Fry the bacon crisply, turning each rasher 2 or 3 times, and dishing it as soon as cooked. Poach the eggs as neatly as possible, and let each lie on a piece of bacon, taking care not to break the yolks of the eggs in dishing them. Serve very hot.

Time—To fry bacon, 3 to 5 minutes. To poach eggs, 3 minutes.
No. 107.—BACON (Fried Rashers of).  
**Ingredients—**

5 or 6 rashers of bacon if streaky, 8 or 9 if back.

**Method—**

Cut the rashers rather thin, and, if a long piece of streaky bacon is used, halve them. Put them in a perfectly clean frying-pan over a nice clear fire. Turn each piece constantly, and directly it is done put it on a hot dish. When all are ready send quickly to table. This dish should be served very hot.

**Time—** 3 to 5 minutes.

**Sufficient for 4 or 5 persons.**

No. 108.—BAKING (Remarks on).

Baking is a method of cooking which requires a certain amount of skill and much care. It is most important to have the oven at the right heat. To ascertain whether the oven is hot enough to bake satisfactorily, one or two simple tests may be employed.

The most usual is to try with the hand. The oven should be so hot that the hand cannot be comfortably borne in it for more than half a minute. Should the oven only feel warm to the hand, it is not hot enough, whereas, if the oven is so hot as to be almost unbearable to the hand, it will be too hot for use, and the door must be left open for a few minutes before anything is put into it.

Another way is to put a small piece of bread on the top shelf, if the bread becomes crisp and slightly coloured in two or three minutes, the oven may with safety be used.

One of the most frequent causes of failure in baking is neglecting to keep the fire well made up. The decreasing heat fails to penetrate the meat or cakes, and joints browned outside but uneatably underdone within, or cakes a half-cooked mass of dough in the centre, are the result.

Bread requires a hot oven with a well-kept-up bottom heat or the bread will not rise evenly, therefore ordinary kitchen ovens are not well adapted to the baking of bread, as the oven being much hotter on the side nearest the fire, the bread will rise more on that side, and the loaves require careful watching and turning to overcome that disadvantage. It is easier to bake small loaves than large, so that it is always desirable for an inexperienced bread maker to form her dough into loaves of 1 lb. or 1½ lbs. weight.

Cakes should be put into a moderately quick oven, unless they are very large, when a thoroughly hot oven is absolutely necessary. All cakes must be very thoroughly cooked, and should be pierced with a small skewer before they are finally removed from the oven. If any of the cake mixture adheres to the skewer, the cakes must be put back for a few minutes and tried again. When the skewer comes out perfectly clean and bright, it is a sure sign that the cakes are cooked through. A buttered paper should be laid on the cakes as soon as they are browned on the top to preserve them from acquiring too much colour.

Pies and tarts should be of a clear golden colour when done, and must also be covered with a buttered paper as soon as the crust begins to take colour. As soon as the crust is sufficiently done, the pie should be put on the lower shelf of the oven to finish cooking. Meat, poultry, and game require a good soaking heat, and should be constantly basted or they will be dry and hard.

No. 112.—BARBEL (To Dress).

Ingredients—
Barbel, ½ pint claret or port wine, ½ pint brown stock, 1 tea-spoonful arrowroot, 1 table-spoonful mushroom ketchup, the juice of ½ a lemon, seasoning pepper and salt.

Method—
Wash and clean the barbel, put it into a saucepan of cold water, salted, bring gradually to the boil, and cook until quite tender. Heat the stock and wine in a small saucepan, mix the arrowroot smoothly with the mushroom ketchup, and stir this into the boiling stock and wine, simmer gently until the sauce is nicely thickened, and add the lemon juice, pepper, and salt.

Take up the barbel, drain it as dry as possible, and place it on a very hot dish. Pour the sauce over it, and serve immediately.

No. 113.—BARBERRIES (Compôte of).

Ingredients—
1 lb. barberries, 2/4 lb. sugar, 1/2 pint water.

Method—
Boil the sugar and water together in a small copper preserving-pan for 10 minutes.

Lay the barberries in the syrup without picking them from their stalks, and simmer them gently for 15 or 20 minutes. Lift them out carefully, arrange them in a silver or glass dish, let the syrup cool slightly, pour it over them, and serve when cold.

Time—To cook barberries, 15 to 20 minutes.

Sufficient for 3 or 4 persons.

No. 114.—BARBERRY JAM.

Ingredients—
6 lbs. ripe barberries, 7 lbs. preserving sugar.

Method—
Remove the stalks from the barberries, and reject any fruit which is not sound. Put them with the sugar, which should be pounded, into a copper preserving-pan, and bring them gently to the boil. Stir constantly, removing all scum as it rises, and continue boiling for 1/2 an hour. Try a little of the jam on a plate from time to time in the ordinary way, and as soon as it sets immediately the jam is done, and should be poured into pots, and tied down whilst hot.

The acidity of the fruit renders a large proportion of sugar necessary.

Time—Altogether, 30 to 40 minutes.

Sufficient for 9 or 10 lbs. of jam.

No. 115.—BARBERRY JELLY.

Ingredients—
To each pound of barberry juice allow 18 oz. sugar.

Strain it through a jelly-bag. Weigh the juice, and put it in a copper preserving-pan with 18 oz. sugar to each pound. Boil it quickly for 8 or 10 minutes. Try a little on a plate, and as soon as it sets pour it into small jars, and tie down at once.

This jelly is excellent served with either hare or mutton, instead of red currant jelly.

Time—To cook fruit, 2 to 3 hours. To boil syrup, about 10 minutes.

No. 116.—BARLEY GRUEL.

Ingredients—
1 dessert-spoonful of Robinson’s prepared barley, 1 tablespoonful cold water, 1/2 pint boiling water.

This gruel is preferred by some invalids to that made with oatmeal. If allowed, a little wine or brandy, added to the gruel immediately before serving, is a great improvement.

Time—10 minutes.

No. 126.—BAVAROISE: or

BOHEMIAN JELLY CREAM.

Bavaroises or Bohemian jelly creams are amongst the most delicious of sweets. They are made on the principle of a lemon sponge, but whipped cream is substituted for the beaten
white of egg. The following recipe is
given as a model, any other fruit of
delicate flavour may be used, the pro-
cess being exactly the same.

**Ingredients**—
1 lb. strawberries, 4 oz. loaf sugar, 1 oz. isinglass, ½ pint water, ½ pint cream, ¼ tea-spoonful of cochineal.

**Method**—
Remove the stalks and bruise the
fruit slightly. Put it with the sugar,
inglass, and water into a saucepan,
bring the mixture to a boil, and let it
simmer for 10 minutes. Strain the
syrup through a jelly-bag or fine cloth
into a basin, and set it aside to cool.
When just becoming a light jelly, whip
the cream to a stiff froth, and add the
strawberry jelly, spoonful by spoonful
to it, beating all the time. There will
probably be a slight sediment at the
bottom of the basin which must not be
added to the cream.

Beat the Bavaroise for about 10
minutes until it becomes very thick,
and put in the cochineal, which should
be well beaten in. Pour into a well-
wetted mould, and put it in a cool
place (on ice if possible) to set.

It should be made some hours before
it is required.

**Sufficient for ¼-pint mould.**

on a very hot dish, and cover them to
keep hot. Beat and strain the yolk of
egg, mix it with the cream, add it to

Method—

Put the butter and flour into a stew-pan large enough to hold the beef, and stir them over a gentle fire for 3 or 4 minutes. Lay in the beef and brown it carefully on both sides. Then add the water and salt and bring it to the boil, skim it carefully and put in the vegetables, cut into slices, and the seasonings.

Boil the beef gently for 4 hours, skimming occasionally and turning it when half done.

Time—To cook beef, 4 hours.

Sufficient for 9 or 10 persons.

No. 139.—BEEF (Braised).

Ingredients—

4 or 5 lbs. ribs of beef, 1 large carrot, 1 onion, 1 turnip, 1/2 tea-spoonful salt, 6 peppercorns, 1/2 blade mace, sufficient cold water to cover the ingredients, 1 table-spoonful arrowroot.

Method—

Bone the beef, roll it into a compact round, and tie it securely with tapes. Wash and peel the vegetables and cut them into thin slices. Choose a stewpan which will take the joint leaving little space to spare. Lay in it half the vegetables, then the meat, and cover it with the rest of the vegetables and the bones of the joint. Add the seasonings, and pour over sufficient cold water to cover the ingredients.

Put on the lid of the saucepan and bring it quickly to boiling point, then let it simmer very gently until cooked. Take it out and place on a very hot dish. Strain off 1/2 a pint of the liquor, and put it in a small clean saucepan. Mix the arrowroot with a table-spoonful of water, and stir this into the hot liquor. Simmer for 2 or 3 minutes until nicely thickened, strain it round the meat, and serve immediately. Some of the slices of carrot and turnip may be arranged round the joint if liked.

Time—To simmer joint, 3 hours.

Sufficient for 5 or 6 persons.

No. 140.—BEEF (Braised—To Serve Cold).

Ingredients—

4 or 5 lbs. ribs of beef, 1 large carrot, 1 turnip, 1 onion, 1/2 tea-spoonful of salt, 6 peppercorns, 1/2 blade of mace, sufficient cold water to cover the ingredients.

Method—

Bone the beef and roll it into a compact round, using tape in preference to skewers, which are unsightly and let out the juices of the meat. Wash and peel the vegetables, and cut them into thin slices. Choose a stewpan which will take the joint with but little space to spare, lay half the vegetables in, then the meat, with the rest of the vegetables and the bones of the joint around and over it, add the salt, spices, and sufficient cold water to cover the ingredients. Put on the lid of the saucepan, and bring it quickly to boiling point. Let it simmer as gently as possible until well cooked. When tender take the joint out and put it on a dish with another plate over it, and a heavy weight on top.
Leave it thus for 2 hours. Meanwhile, strain the liquor the meat was boiled in, and reduce it to glaze by recipe No. 590. Brush the liquid glaze over the meat, giving it two or three coats until an even, shining surface is obtained. Allow the glaze to dry, and the meat is then ready for table. It will keep several days in cool weather.

Note.—Though the addition of cold water in the first instance may appear unscientific, it is not really so, as the vegetables form a sort of case to the meat and preserve its juices, besides communicating their own flavour to the joint.

Time—To simmer beef, 3 hours.
Sufficient for 5 or 6 persons.

No. 141.—BEEF, BRISKET OF (Boiled).

Ingredients—
7 lbs. brisket of beef, 4 carrots, 2 onions, 1 small head celery, 1 sprig parsley, 1 sprig thyme, 1 tea-spoonful salt, 1 oz. flour, 2 table-spoonfuls mushroom ketchup.

Method—
Lay the beef in a stewpan nearly of its own size; clean the vegetables, cut them into small pieces, and lay them round and on the beef; add the herbs and seasoning, and pour in sufficient cold water to cover the meat. Bring the beef slowly to boiling point, skimming it carefully when necessary, and boil for 4 hours. Strain off a pint of the broth it was cooked in and put it in a fresh saucepan. Mix the flour smoothly with the mushroom ketchup and add them to the boiling broth. Boil the broth for 3 or 4 minutes until it is thick and rich, and add a little browning if it is not a good colour. Take up the beef, drain for a minute, put it on a very hot dish, pour the thickened broth over it, and serve at once. If liked, some of the vegetables can be arranged round the dish and served with the meat.

Time—4 hours.
Sufficient for 7 or 8 persons.

No. 142.—BEEF CAKE.

Ingredients—
1½ lbs. rump steak, ½ lb. suet, ½ lb. streaky bacon, ½ tea-spoonful dried sweet herbs, seasoning pepper and salt, 1 egg, ½ pint brown gravy.

Method—
Remove all skin and fat from the steak and chop it and the suet finely. Mix the seasonings thoroughly with them, beat and strain the egg and stir it into the mixture. Butter a cake tin, line it with the bacon, cut into very thin slices, put in the minced beef, and cover it with the rest of the bacon. Bake in a good but not fierce oven, taking care it should not become dry by cooking too quickly. When done turn it out of the mould and take off the bacon. Have ready ½ pint of brown gravy very hot, pour it over the cake and serve.
This is an excellent dish served cold without the gravy.

Time—About 1½ hours.
Sufficient for 5 or 6 persons.

No. 143.—BEEF (Collared).

Ingredients—
7 or 8 lbs. thin flank or ribs of beef, 6 oz. salt, 1 oz. saltpetre, 2 oz. sugar, 1 dessert-spoonful chopped parsley, 1 tea-spoonful dried sweet herbs, 1 tea-spoonful salt, 6 crushed peppercorns, 2 carrots, 2 onions, water.

Method—
Mix together the salt, sugar, and saltpetre, and rub them well into the beef. Put it in a deep dish, and turn
it every day for a week, rubbing it each time. On the eighth day bone it carefully, and sprinkle it over with the mixed parsley, herbs, pepper and salt. Roll the beef up tightly, secure it with tape, and then wrap it round carefully in a cloth. Lay it in a stewpan nearly of its own size; cut the carrot and onion into small pieces and put them round and on the joint. Pour in sufficient water to cover it, and boil gently for 6 or 7 hours. Lift out the beef, lay it on a strong dish without untying it, put a plate on it with a heavy weight on top, and let it remain until quite cold. Then take it out of the cloth, remove the tapes, put it on a fresh dish, garnish with very fresh parsley, and serve cold.

Make a puff, or short crust, as directed above; cut a very thin strip, 1 inch in width, moisten the edge of the pie-dish and lay it round, pressing it firmly to make it adhere. Roll out the crust for the cover and put it on, decorate the edges neatly, beat and strain the remaining egg, brush the crust in every part with it, and bake the pie in a good oven for about 1½ hours. No. 191.—BOILING (Remarks on).

Meat intended to be served should be put on in very hot water, the better to keep in its juices, brought quickly to boiling point, and simmered gently until done. An apple sliced and added to the water the meat is cooked in is a simple and effective way of rendering the meat tender. Fresh meat and bones intended for soup should be covered with cold water, and heated as slowly as possible by the side of the stove to draw as much of the goodness as is possible from the meat. They should be very gently stewed for some hours until every particle of nourishment has been extracted.

Most kinds of fish are put on in cold water, well salted. Fish must always be very gently simmered, or the skin will break and the fish present a very unsightly appearance at table. Whilst fish must never be served in the least degree raw, it is equally important not to over-cook it, or the flavour will be much impaired. It is well to test the fish very lightly with the blade of a knife, by inserting it in the thickest part of the fish near the backbone. If the fish is inclined to come away easily from the bone it is done, and should be well drained and served without delay.

Vegetables must always be cooked in plenty of fast-boiling water, which should be well salted, and, for green vegetables, a tiny piece of soda, the size of a pea, may be added to
each \( \frac{1}{2} \) gallon of water; this helps to preserve their colour, but very little must be used or the vegetables will taste soapy. To obtain dressed vegetables in the greatest perfection, the main things to be observed are: to dress them as fresh as possible; not to put them in the saucepan until the water is really boiling fast; to cook them in plenty of water and as rapidly as possible (without a cover to the saucepan); and to serve them very hot the moment they are done.

Puddings should be put on in plenty of boiling water to cover them, and a little fresh boiling water added from the kettle as that in the saucepan boils away. They must not be allowed to cease boiling for an instant. Delicate puddings, such as cabinet pudding, should be steamed in about \( 1 \frac{1}{2} \) inches of water, a little more being added from time to time as the water evaporates.

No. 192.—BOUILLON.

Ingredients—
3 lbs. leg of beef, 2 quarts water, 2 carrots, 2 turnips, 1 onion, 2 leeks, \( \frac{1}{2} \) head of celery, \( \frac{1}{2} \) tea-spoonful savoury herbs, 1 tea-spoonful salt, 12 peppercorns.

Method—

Cut the meat into several pieces, lay them in a flat stewpan, and pour the water on them. Let this heat slowly by the side of the fire, skim it when it begins to boil, and simmer it gently for 30 minutes, skimming it carefully from time to time. Well wash the vegetables, slice them, and add them, with the herbs and seasoning, to the meat. Stew the broth gently for another 3\( \frac{1}{2} \) hours. Strain it into a large bowl, and set it aside to cool. When required for use, skim off every particle of fat, and heat as much as is required to boiling point.

This is a nourishing and inexpensive soup, and if carefully prepared, does not require any further clearing by means of white of egg or meat. It may be varied in many ways by the addition of Italian paste, semolina, Julienne vegetables, etc. They should be gently simmered in the broth, when it is heated up for table, until they are tender. It is not advisable to use the bouillon as a soup the day on which it has been made, as it is very difficult to render it entirely free from fat.

Time—Altogether, about 4 hours.

Sufficient for 2 quarts of soup.

No. 193.—BOVRIL (To Use for Gravies).

Ingredients—
1 large tea-spoonful bovril, \( \frac{1}{4} \) of a small onion, \( \frac{3}{4} \) pint water, \( \frac{3}{4} \) tea-spoonful arrowroot, seasoning pepper and salt.

Method—

Put the bovril in a small saucepan, pour on it the boiling water, and stir well. Slice the onion, and simmer it in the bovril for 15 or 20 minutes. Then take out the onion, mix the arrowroot with a table-spoonful of cold water, stir this into the gravy, and add a seasoning of pepper and salt. Simmer for 2 or 3 minutes until sufficiently thickened; strain and serve.

This will be found a convenient method of making gravy for poultry or game, should there happen to be no stock in the larder. If bovril is used for cooking, it should be bought in the larger bottles of 8 or 16 oz. The small bottles are proportionately dearer, and if used constantly, would be rather an expensive luxury.

No. 194.—BRADENBURG PUDDING.

Ingredients—
1 \( \frac{1}{2} \) lb. black currants, 6 oz. moist sugar, \( \frac{1}{2} \) pint water, 7 or 8 slices bread and butter, \( \frac{3}{2} \) pint cream.
Method—
Strip the currants from their stalks and wash them. Put them in a saucepan with the sugar and water, bring to the boil, and stew them gently until thoroughly cooked. Well butter a pudding-basin, and line it with moderately thin bread and butter, cutting off all the crusts, and fitting in the pieces so as to form a neat case. Take the currants off the fire, and put them into the basin spoonful by spoonful, pressing them very gently against the sides. There should be plenty of rich, thick syrup for the currants to be very moist. When the basin is quite full, fit in a cover of bread and butter, and press it slightly. Put a saucer or plate over the basin, with a weight on top, and set it aside for at least 6 hours. Turn it out carefully on to a glass dish. Whip the cream, and cover the pudding with it.

This pudding can be made with advantage the day before it is required. It should be left in the basin as long as possible, and not turned out until required to be served.

Any juicy fruit may be used for this recipe. It is excellent made with raspberries and red currants, or with damsons. The fruit must, in every case, be well-cooked, with sufficient juice just to soak through the bread and butter case without breaking it.

Time—To cook currants, about 1 hour.
Sufficient for 5 or 6 persons.

No. 195.—BRADENBURG PUDDING
(Made with Blackberries).

Ingredients—
1 lb. blackberries, ½ lb. apples, 6 oz. sugar, ½ pint water, 7 or 8 slices bread and butter, ½ pint cream.

Method—
Wash and pick the blackberries, peel, core, and slice the apples, and put these together in a saucepan with the sugar and water. Bring to the boil, and then simmer gently until the blackberries are quite tender.

Well butter a pudding-basin, and line it with moderately thin bread and butter, from which cut off all the crust. Fit in the pieces exactly, so as to form a neat case. Take the hot blackberries off the fire, and with a spoon put them carefully into the basin, pressing the fruit very gently against the sides. There should be plenty of rich, thick syrup for the fruit to be very moist.

When the basin is quite full, fit in the bread and butter cover, and press it gently, put a saucer or plate over the basin with a weight on top. Stand it aside for 6 hours. Turn it out carefully into a glass dish. Have the cream ready whipped, and cover the pudding with it.

Time—To cook blackberries, 1½ to 2 hours.
Sufficient for 5 or 6 persons.

No. 196.—BRAWN.

Ingredients—
1 pig’s head, 1 lb. beef steak, 2 teaspoonfuls salt, 1 tea-spoonful pepper, 1 tea-spoonful mixed sweet herbs, 1 onion, 1 carrot, water.

Method—
Cleanse the head carefully. Put it into a stewpan with the beef. Add the vegetables, which must be cut into small pieces, and pour in sufficient cold water to cover the meat. Boil gently for 4 hours, skimming occasionally.

Make a large earthenware dish very hot in the oven, lift out the pig’s head and drain it for a minute or two. Then lay it on the hot dish, and, putting that on the fender, remove all the bones from the head as quickly as possible, and cut it and the beef into small pieces. Sprinkle in the seasoning and
mix well. Then turn the brawn into oval cake moulds and put aside to cool. Put a plate on the top of each mould, with a heavy weight on top. The brawn will keep for several days. It is necessary to put the pig's head on a very hot dish, and chop the meat before the fire, or the fat will settle in the meat and spoil the brawn. When required for table, dip the mould into boiling water for half a minute. Turn the brawn into a clean dish, and garnish with very fresh parsley.

**Time**—To cook, 4 hours.

**Sufficient for 8 or 10 people.**

---

**No. 197.—BRAWN (Another Recipe).**

**Ingredients**—

1 pig's head, 1 tea-spoonful mixed herbs, 6 crushed peppercorns, 1/4 tea-spoonful salt, 3 carrots, 2 onions, 1/2 head celery, 2 sprigs parsley, water.

**Method**—

Procure a lightly salted pig's head, and have it cut in half and boned at the butcher's. Spread it out flat. Cut some of the flesh from the lean parts, and lay it on the fatter portions. Cut the tongue into thin strips and lay them in the head. Mix together the herbs, crushed peppercorns, and salt, and sprinkle half the mixture over the pig's head. Roll the head up as tightly as possible. Lay the roll in a stout and very clean cloth, and tie it round very firmly with tape or string.

Choose a stewpan a little larger than the brawn. Cut the vegetables into small pieces, and cover the bottom of the pan with part of them. Lay the roll of brawn on this, and put the rest of the vegetables, the seasoning, and parsley round and on the roll. Pour in sufficient cold water to cover the brawn. Bring the meat to boiling point, and boil gently for 4 hours.

Then turn the contents of the stewpan just as they are into a deep pan, and set it aside for 1 hour. At the end of that time lift out the brawn. Lay it in a dish. Put a plate on it, with a heavy weight on top, and leave it to become quite cold. Then take it out of the cloth, put it on a fresh dish, and it is ready for table.

**Time**—Altogether, until ready about 5½ hours.

To become quite cold, leave about 5 or 6 hours.

**Sufficient for 8 or 10 persons.**

Mix the salt with the flour, make a hollow in the centre, pour in the liquid, and mix the dough with a strong wooden spoon. Then knead it lightly, but thoroughly, Lay it in an earthenware pan, cover this with a cloth, and set it aside in a warm but not hot place until it is well risen, which will be in about 1 hour. Knead it thoroughly again, and leave it to rise for another hour; after which make it up lightly into loaves, lay them on buttered tins, and bake in a good oven until well cooked. The loaves should not be taken out of the oven until they feel firm and crisp, and sound hollow when tapped with the finger.

**Time**—About 1 1/2 hours.

No. 231.—CABBAGE, RED (Pickled).

**Ingredients—**
1 red cabbage, 3 table-spoonfuls salt, 1 quart vinegar, ½ oz. crushed ginger, 1 oz. whole black pepper, small pinch cayenne, 10 drops cochineal.

**Method—**
Remove the outside leaves and the stalks of the cabbage, and cut it across in very thin slices. Lay these on a dish, and sprinkle over them the salt. Cover them with another dish, and let them remain for 24 hours. Then turn them into a colander, let them drain thoroughly, and place them in a jar. Boil up the vinegar and spices, add the cochineal, and set it aside to cool. When cold, strain it over the cabbage, tie down the jar, and set aside for a week.

This pickle should be used when ready, and not stored away for a long time, as it does not keep well. It is best made in winter, as the leaves are much more crisp when just touched by the frost.

**Ingredients—**
1 red cabbage, 1 small apple, 1 pint stock, 2 table-spoonfuls vinegar, seasoning pepper and salt, 1 table-spoonful pounded sugar.

Chop the apple finely, and put it with the cabbage, vinegar, and ¼ pint of stock into a stewpan. Stew gently for 1 hour. Then add the remainder of the stock, the pepper, salt, and sugar, and stir all together over the fire for 8 or 10 minutes. Serve very hot.

*Time—1 hour and 10 minutes.*

*Sufficient for 4 or 5 persons.*

**No. 237.—CAKES (Remarks on).**

All cakes should be thoroughly cooked in a tin lined with buttered paper, and should have a buttered paper laid over them as soon as they are nicely browned on top.

It will be observed that I have generally given directions that the butter is to be melted with as slight a degree of heat as will suffice to liquify it, and beaten in, a tea-spoonful at a time, the last thing before the cake is put into the oven. This will be found much less trouble than beating the butter to a cream and mixing the other ingredients with it. In a few instances, such as pound cake, I have adhered to the old-fashioned way as being suited to that particular composition. In these cases the butter should be put into a small, hot basin, and beaten with
a wooden spoon until it becomes smooth and creamy.

Eggs must always be beaten and strained before they are added to the cake, and any other liquid, such as milk or brandy, should be added to the eggs before they are mixed with the dry ingredients, so that the whole cake is moistened at once.

Currants should be washed and picked, then spread out on a large dish (which should be put on the kitchen fender), and very slowly dried. They must be quite dry before they are used or the cakes will be heavy.

Sugar should be pounded, but brown sugar may be used in plain cakes.

Great care must be taken in the baking of cakes. Further directions for the heat of oven, etc., may be found under "Remarks on Baking."

Only really fresh eggs and fruit of fine quality should be used.

No. 238.—CAKE (Birthday).

Ingredients—

1 lb. flour, 1 tea-spoonful baking-powder, 1 pinch salt, ½ lb. butter, 6 oz. currants, 6 oz. sultanas, 4 oz. candied peel, 4 oz. sugar, 2 oz. ground sweet almonds, 3 eggs, ½ pint milk, 1 table-spoonful brandy, icing No. 668, made with whites of 3 eggs and sugar in proportion.

Method—

Wash, pick, and dry the currants, pick the sultanas and finely shred the candied peel. Mix the baking-powder and salt with the flour, and lightly rub in the butter; add the fruit, peel, sugar, and almonds, and mix all well together. Beat and strain the eggs, add the milk and brandy to them, moisten the cake with these, and beat well for a few minutes. Line a cake tin with buttered paper, and half fill it with the mixture. Bake it carefully in a good oven, and when done take the cake out of the tin and stand it upon its side to cool.

As soon as it is cold make an icing as directed above, and cover the cake with it, using the blade of a knife to spread the icing. Keep about a table-spoonful of the icing, and colour it with 2 or 3 drops of cochineal; twist a cornet of stiff writing-paper, fill it with the coloured icing, and write the date of the birthday on top of the cake. Set it in a very cool oven for the icing to harden, and put it away to become firm.

This cake should be made at least 2 days before it is needed.

Time—To bake cake, 1½ to 2 hours.
To set the icing, 30 minutes.

Sufficient for 1 large cake.

No. 239.—CAKE (A Plain).

Ingredients—

⅛ lb. flour, 1 tea-spoonful baking-powder, 6 oz. butter, or clarified dripping, ½ lb. currants, 6 oz. sugar, ½ pint milk, a pinch salt.

Method—

Wash and pick the currants and dry them thoroughly. Mix the baking-powder and salt with the flour, and rub in the butter or dripping, add the currants and sugar, and mix well. Make the milk warm but not hot, moisten the cake with it, and beat it for a few minutes. Then half fill a buttered cake tin with the mixture, and bake in a moderately quick oven. When cooked turn the cake out of the tin, and stand it on its side to cool.

Time—1½ hours.

Sufficient for 1 large cake.

No. 240.—CAKE, POUND (Rich).

Ingredients—

⅓ lb. flour, ½ lb. butter, ½ lb. pounded sugar, ½ lb. currants, 2 oz. candied peel, 4 eggs, 1 table-spoonful brandy.
Method—
Wash, pick, and dry the currants, and finely shred the candied peel. Beat the butter to a cream, dredge in the flour, sugar, currants, and peel. Beat and strain the eggs, add the brandy to them, and moisten the cake with these. Beat thoroughly for a few minutes, then half fill a cake tin which has been lined with buttered paper, and bake in a good oven. When cooked turn the cake out of the tin and stand it on its side to cool.

Time—1½ hours.

No. 241.—CALF’S FEET (Boiled).

Ingredients—
2 calf’s feet, juice of 1 lemon, 6 peppercorns, 2 sprigs parsley, ½ small onion, ½ pint parsley, and butter No. 892.

Method—
Put the calf’s feet in a saucepan with the lemon juice, sliced onion, parsley, and peppercorns. Pour in sufficient cold water to cover them, bring to the boil, and simmer gently for 2½ hours. Take them out, drain them, and lay on a very hot dish, pour the parsley and butter over, and serve.

Time—2½ hours.
Sufficient for 4 or 5 persons.

No. 242.—CALF’S FOOT BROTH.

Ingredients—
1 calf’s foot, 1 oz. butter, 1 quart cold water, the yolks of 2 eggs, 1 teaspoonful lemon juice, seasoning salt and cayenne.

Method—
Melt the butter in a small stewpan, add the foot, cut into small pieces, and brown them for 8 or 10 minutes. Then pour in the water, and simmer gently for 1½ hours, strain into a basin, and set it aside to cool. When perfectly cold take off every particle of fat, and heat the broth nearly to boiling point. Beat and strain the yolks of eggs, add the broth to them, and moisten the cake with these. Beat thoroughly for a few minutes, then half fill a cake tin which has been lined with buttered paper, and bake in a good oven. When cooked turn the cake out of the tin and stand it on its side to cool.

Time—To simmer stock, 1½ hours.
To heat and thicken broth, altogether 10 to 15 minutes.
Sufficient for 3 or 4 persons.

No. 243.—CALF’S FOOT JELLY (Stock for).

Ingredients—
2 calf’s feet, 2 quarts water.

Method—
See that the feet are perfectly clean. The butcher will probably send them in scalded, etc. Cut them into pieces, and lay them in a saucepan which will hold a gallon. Pour the water over, and bring slowly to the boil. Stew gently for 5 hours. By the end of this time the stock should be reduced to half. Strain it through a sieve, and set aside for 12 hours.
Sufficient for 1 quart of stock.

No. 244.—CALF’S FOOT JELLY (Clear Wine).

Ingredients—
1 quart calf’s foot stock, the whites and shells of 4 eggs, ½ pint cold water, the strained juice of 4 lemons and the rinds of 2, 5 oz. loaf sugar, ½ pint sherry, 1 table-spoonful brandy.

Method—
Take as much of the fat as possible off the top of the stock with a spoon.
Dip a cloth into boiling water, wring it out, and wipe off the remainder of the grease with it. It is most important for the stock to be absolutely free from any fat, as the grease would seriously interfere with the process of clarification. Whisk the whites and crushed shells of the eggs with the water for a minute, and add them with the rinds and juice of the lemons, the sugar, brandy, and sherry, to the stock. Put all in a saucepan, which it should only half fill, and set it over the fire, stir briskly until it boils, then take the spoon out, and let it simmer gently for 8 minutes. Then strain it through a jelly-bag or clean cloth, pouring back that which first passes through, until the jelly runs clear. Pour it into a wetted mould. It will be ready for table in 12 hours. This jelly is capable of great variation in flavour and appearance, as will be noted in other recipes. Sufficient for 1-quart mould.

Simmer gently, and continue to stir until nicely thickened, add the butter, and stir round until it is dissolved. Strain all through a fine sieve into a fresh saucepan, cut the meat into ½-inch squares, add them to the sauce, and heat very gently at the side of the fire for 20 minutes. Then stir in the lemon juice, salt, and a very little cayenne, and serve at once.

When cold lift out the head and cut rather more than half of it and the tongue into dice, about ½ an inch square. Skim every particle of fat off the stock and put it in a fresh saucepan with the pieces of head. Let them simmer about 30 minutes, or until the gelatinous skin of the head is perfectly tender. **No. 251.—CANAPÉS (Remarks on).**

Canapés are small _hors d'œuvres_ served in place of oysters at the commencement of dinner. Each canapé is laid on a plate, which is put in the diner's place before the guests enter the dining-room, as is usual with oysters. Canapés generally consist of anchovies, caviare, lax, etc., laid on a small square of thin white or brown bread and butter, and garnished with stoned olives, hard-boiled yolk of egg, and a tiny portion of very fresh salading. Simplicity of flavour and delicate neatness of appearance are the main points to be considered. A few simple recipes are given below. An almost endless variety of canapés can be made if judgment and a little forethought are used.

**No. 252.—CANAPÉS (To Prepare the Foundations for)._**

Cut 2 or 3 thin slices of white or brown bread, butter them thinly, and cut them into very neat 2-inch squares. The bread should be fresh but not crumbly, and the slices not more than \( \frac{1}{4} \) of an inch in thickness. Some little practice may be necessary to get the little squares exactly the right size, but as much of the appearance of the canapé depends upon the bread and butter being of sufficient substance to hold its dressing neatly without being thick and clumsy, some attention should be given to this point.

**No. 253.—CANAPÉS, ANCHOVY._**

_Ingredients—_

- 4 squares of bread and butter, 2 anchovies, 4 olives, 1 small round lettuce.

_Method—_

Prepare the squares by recipe No. 252, fillet the anchovies, stone the olives, and pull all the leaves off the lettuce until it is about the size of a walnut. Decorate each square with fillets of anchovy cut to its size, and laid lengthwise and across to form lattice-work; cut each olive into small pieces and put them in the hollows left by the strips of anchovy, dust a very little pepper over, put a tiny lettuce leaf on the centre of each, lay each canapé on a plate, and serve.

_Sufficient for—_Allow 1 canapé to each person.

No. 296.—CHARLOTTE RUSSE.

Ingredients—
12 sponge finger biscuits, 3/4 pint cream, 1/4 oz. isinglass, 1/4 pint boiling milk, 1/2 tea-spoonful vanilla flavouring, the white of 1 egg.

Method—
Split the biscuits carefully in halves by inserting the point of a knife between the joins. Trim each piece into a strip about 1/2 an inch wide. When all are ready place them in a row, and cut the edges even at the top and bottom. Have a Charlotte russe tin ready, and put the white of the egg in a plate. Take a strip of biscuit and stand it against the side of the mould; take a second strip, dip one side very lightly into the egg, and press it gently against the one in the mould; moisten the edge of a third piece and press it to the second. Continue in this manner until the sides of the tin are completely lined. Should the mould be wider at the top than at the bottom some of the biscuits must be shaped to correspond, as it is imperative that the case be quite firm throughout. Put the isinglass in a cup, pour the boiling milk on it, and stir it occasionally until dissolved. Have the cream in a large basin, and whip it to a thick froth, thoroughly stir the melted isinglass, which by this time will have cooled considerably, but should still be quite liquid, and add it with the vanilla flavouring gradually to the cream. Beat for 3 or 4 minutes until the cream is again very thick, then pour it into the mould, and set it aside to stiffen. In 2 hours it will be quite firm.

At first it may be found rather difficult to fit the strips of biscuit neatly into the mould, but a little experience will soon overcome this difficulty.

Sufficient for 1 1/2-pint mould.

No. 297.—CHEESE (To Serve).

Cheese may be served either laid on a very white serviette, garnished with very fresh parsley, so that each person may help himself, or cut into small pieces about an inch square, and neatly
arranged on a small dish. For informal meals the previous course is often adopted, as it is much less wasteful. Stiltons are generally served whole, with a very white napkin pinned round the cheese.

Pulled bread or plain water biscuits should be served with it, and very young radishes or watercress are a nice addition to the cheese course.

No. 298.—CHEESE (Pounded).

Ingredients—

6 oz. cheese, 2 oz. butter, seasoning salt and cayenne.

Method—

Cut the cheese into small pieces, put it with the butter into a very clean mortar, and pound them to a smooth paste. When no lumps remain, mix in a seasoning of salt and cayenne, press the pounded cheese into small jars, and put it away for use. If the cheese is required to be kept more than 2 or 3 days, a small quantity of liquid butter must be poured into each jar, so as to exclude the air, or the cheese will go mouldy. If this is done the cheese will keep for a week or 10 days. Cheese which has become dry may very well be utilised for this recipe, and the pounded cheese when done may be used for cheese toasts or rare bits, in place of fresh slices.

Sufficient for ½ lb. pounded cheese.

Beat the white of the egg to as stiff a froth as possible, lightly mix this with the other ingredients; fill the ramakin cases, and bake in a moderate oven.

Time—10 to 15 minutes.

Sufficient for 6 ramakins.

Mix the flour smoothly with ¼ pint of the milk, put the rest of the milk in a lined saucepan, and heat it to boiling point; stir the mixed flour into this, and simmer for 2 or 3 minutes until it is very thick. Then take it off the fire, add the butter, grated cheese, salt and cayenne, and the beaten and strained yolks of the eggs; whisk the whites to as stiff a froth as possible, mix them gently, but thoroughly, with the soufflé mixture, pour all into the soufflé tin, and bake in a moderate oven.

Do not open the oven door for 10 minutes after the soufflé is put in or it will not rise properly. Fold a very white napkin neatly round the tin, and serve immediately it is taken out of the oven.

Time—About 30 minutes.

Mix the flour carefully with the milk, and put it in a lined sauce-pan with the pounded cheese; heat them gently, stirring occasionally until the cheese is melted, and the whole forms a thick, smooth sauce. Break the egg carefully, separating the yolk from the white, remove the speck and beat the yolk slightly; stir it to the boiling mixture, add the salt and a very little cayenne, and mix well. Whip the white of the egg to as stiff a froth as possible, mix it quickly and thoroughly with the cheese mixture; half fill the soufflé cases, and bake in a moderate oven.

They should rise very much, and be lightly browned on top and firm in the centre. Serve immediately they are taken from the oven.

Put the isinglass in a lined saucepan and pour on it the claret. Let it stand for 5 minutes, then add the lemon rind very thinly peeled, the strained juice, and the sugar. Break the eggs carefully, so as not to take a speck of the yolks, and whip the whites and crushed shells together with ¼ pint of cold water. Add these to the other ingredients, and heat all slowly, stirring occasionally until the jelly boils. Then take out the spoon and simmer gently for 10 minutes. Do not stir it after it has reached boiling point, or the jelly will not be clear. Turn the contents of the saucepan into a jelly-bag (which previously dip in hot water and wring dry), let it run through, and if not quite clear strain a second time. Pour into a well-wetted mould and set aside to cool. In summer, place the jelly on ice for 3 or 4 hours before serving.

**Sufficient for 1½-pint mould.**

Method—

Mix the flour and cream or milk smoothly together, put them in a very small saucepan with the butter, and stir them over the fire until they become very smooth and thick, then add the chicken, which must be finely minced, and a seasoning of pepper and salt, mix well and set aside to cool. When cold, divide the bacon into 6 pieces, 3 inches long and 2 inches wide, lay a spoonful of the chicken mixture in the centre of each piece of bacon, roll them up neatly, and run tiny skewers through them. Dip the cromesquis in the batter, have ready a saucepan of boiling lard, with the frying-basket in it, and fry the cromesquis for 5 or 6 minutes until of a light golden colour, then drain them carefully, remove the skewers, and serve them on a hot napkin in a very hot dish, and garnish with fried parsley.

Time—5 or 6 minutes.

Sufficient for 3 or 4 persons.

No. 392.—CROMESQUIS (Oyster).

Ingredients—

1 doz. oysters, seasoning pepper and salt, ½ tea-spoonful of lemon-juice, frying batter No. 123, boiling lard.

Method—

Open the oysters carefully, put them in a lined saucepan with the lemon-juice and seasoning pepper and salt, strain the liquor over them, heat them gently to boiling point, but do not let them boil, then turn them into a basin and let them cool. When cold, remove their beards. Divide the bacon into 6 pieces, 3 inches long and 2 inches wide, lay two oysters on each piece, roll them up carefully, and run a tiny skewer through each, and dip them in batter. Have ready a saucepan of boiling lard, with the frying-basket in it, and fry the cromesquis for 5 or 6 minutes until of a light golden colour, drain them carefully, remove the skewers, and serve them on a hot napkin in a very hot dish, and garnished with fried parsley.

Time—To heat oysters slowly, 10 minutes.

To fry the cromesquis, 5 or 6 minutes.

Sufficient for 3 or 4 persons.
No. 393.—CROÛTONS (Fried).

*Ingredients—*
3 slices bread, 2 oz. butter.

*Method—*
Cut the bread a third of an inch thick from a rather stale loaf, and stamp it out into rounds with a plain cutter about 1½ inches in diameter. Melt the butter in a small frying-pan, put in the croûtons, and fry them until they are quite crisp, and of a pale golden colour. Drain them carefully on kitchen paper, and they are ready for use.

When croûtons are used as a foundation for small savouries, much of the excellence of the savoury depends on their careful preparation. They must be free from grease, crisp but not tough, and very hot.

No. 394.—CRUMPETS (To Toast).

*Ingredients—*
6 or 7 crumpets, 1 oz. butter.

*Method—*
Have a very clear fire and a hot muffin-dish and cover ready. Toast the crumpet carefully until nicely browned on one side, then turn it and toast on the other. Be very careful not to hold it so near as to let it burn or get blackened against the bars.

Butter each crumpet, as it is done, on the top side, sprinkle it with a very little salt, cut it in half, and place it in the hot dish. Do all as quickly as possible, but remember that they must be thoroughly cooked. Serve immediately they are ready, and let them be eaten very hot.

For crumpets, muffins, hot toast, etc., only *very fresh* butter should be used, as heat always accentuates any fault in this respect.

_Time—* For 6 crumpets, about 15 minutes.

*Sufficient for 3 or 4 persons.*

No. 395.—CRUST (For Raised Pies).

*Ingredients—*
1 lb. flour, 2 oz. chopped suet, 2 oz. butter, ½ pint water.

*Method—*
Chop the suet finely, and put it with the butter into a saucepan with ½ pint of boiling water. Simmer them for 2 or 3 minutes until melted, then put the flour into a basin, make a hollow in the centre, and strain the water into it, using a wooden spoon to mix it into a smooth paste. Turn it on to a floured board, and when cool enough to touch, knead it slightly with the hands, sprinkle it with flour, roll it out ½ inch thick, and use to line the moulds as directed.

No. 396.—CRUST, BUTTER.

*Ingredients—*
1 lb. flour, 6 oz. butter, 4 or 5 tablespoonfuls milk, ¼ pint water, 1 pinch salt.

*Method—*
Mix the salt with the flour, and with a wooden spoon make it into a smooth paste with the milk and water. Turn it on to a floured board, and roll it out. Cut the butter into thin slices, lay it on half the paste, fold over it the other half, and roll it out into a sheet ⅛ of an inch thick. Fold this in three, roll it out again, and the crust is ready for use.

No. 397.—CRUST, CREAM.

*Ingredients—*
⅔ lb. flour, 1 oz. butter, 1 tea-spoonful sugar, about ½ pint cream.

*Method—*
Mix the sugar with the flour, rub in the butter, and with a wooden spoon mix in sufficient cream to make a smooth paste. (It is impossible to give exactly the quantity of cream re-
quired, as it much depends on its thickness.) Turn it on to a floured board, knead it slightly, roll it out to \( \frac{1}{2} \)-inch thickness, and it is ready for use.

This makes a very delicate crust for fruit tarts, etc., and may be used in place of puff or short crust.

**No. 398.—CRUST, DRIPPING.**

**Ingredients**

- 1 lb. flour, 4 oz. clarified beef dripping, \( \frac{1}{2} \) tea-spoonful baking-powder, \( \frac{1}{4} \) tea-spoonful salt, about 3 table-spoonfuls milk, \( \frac{1}{4} \) pint water.

**Method**

Mix the salt and baking-powder with the flour and rub in the dripping, then add the milk and water gradually, and with a wooden spoon make the mixture into a smooth paste; turn it on to a well-floured board, roll it out, sprinkle it with flour, roll it out again to required thickness, and it is ready for use.

**No. 399.—CRUST, LARD.**

**Ingredients**

- 1 lb. flour, 4 oz. lard, 1 oz. butter, 3 table-spoonfuls milk, \( \frac{1}{4} \) pint water.

**Method**

Rub the lard and butter into the flour, and make them into a smooth paste with the milk and water, using a wooden spoon to mix the dough with, turn it on to a floured pastry-board, roll it out once or twice, and the crust is ready for use.

**No. 400.—CRUST, PUFF.**

**Ingredients**

- 1 lb. flour, 1 lb. butter, yolks of 2 eggs, juice of 1 lemon, \( \frac{1}{4} \) tea-spoonful salt, 7 or 8 table-spoonfuls water.

**Method**

Put the flour in a basin and make a hollow in the centre, in which place the yolks of the eggs (first removing the speck), salt, lemon juice, and sufficient very cold water to make a smooth paste, mixing the dough with a wooden spoon as the water is added. Turn the crust on to a floured pastry-board, and leave for 5 minutes, then roll it out into a sheet \( \frac{1}{2} \) an inch in thickness, and sift a little flour on it. Press the butter into a sheet about an inch thick, and lay it in the centre of the paste, fold over each end on to it, entirely hiding the butter, sift a little flour over, and roll the paste out into a long sheet \( \frac{1}{2} \) of an inch thick. If this is properly done the paste and butter will flatten out without the butter breaking through the paste. Sift a little flour on the board and on the paste between each rolling-out. Fold the paste in three, and roll out; fold again in three, roll out a second time, then put the paste on a floured dish, and leave it in a very cool place, or, in summer, over ice for \( \frac{1}{2} \) an hour. At the end of that time fold and roll out twice again, set it aside for \( \frac{1}{2} \) of an hour, then fold and roll out twice—making 6 rollings-out in all—and it is ready for use. It is most important to have the butter thoroughly cold and hard, as if it is at all soft and greasy it is impossible to prevent it breaking through the paste, which will then not rise properly. Should it seem at all watery, wring it dry in a cloth, or the paste will be heavy, but if good fresh butter is used this ought not to be necessary.

**No. 401.—CRUST, HALF PUFF.**

**Ingredients**

- 1 lb. flour, 8 oz. butter, yolk of 1 egg, juice of 1 lemon, 7 or 8 table-spoonfuls water.

**Method**

Rub 1 oz. of the butter into the flour, make a hollow in the centre, in which place the yolk of the egg (first removing the speck), lemon juice, and
sufficient very cold water to make it into a smooth paste, using a wooden spoon to mix it with. Turn the paste out on to a floured pastry-board, and roll it out into a sheet \( \frac{1}{2} \) an inch in thickness. Cut the remainder of the butter into slices \( \frac{1}{2} \) an inch thick, lay them on half the paste, fold over the other half, and roll it out into a sheet \( \frac{1}{2} \) of an inch thick; fold in three, roll it out again and set it aside in a very cool place on a floured dish for 20 minutes, then fold and roll out twice, and it is ready for use.

Mix as lightly as possible with a wooden spoon, then turn the paste on to a floured board and roll it out. Fold it in two and roll again. Then roll it to the size you require, and it is ready for use.

No. 403.—CRUST, SHORT (Very Good).

**Ingredients**

- 1 lb. flour, 10 oz. butter, 3 table-spoonfuls milk, \( \frac{1}{4} \) pint water, 1 pinch salt.

No. 404.—CRUST, SUET.

**Ingredients**

- 1 lb. flour, 6 oz. finely-chopped or refined suet, \( \frac{1}{4} \) tea-spoonful salt, 3 table-spoonfuls milk, \( \frac{1}{4} \) pint water.

Mix the salt with the flour, rub in the suet, and make them into a firm paste with the milk and cold water, using a wooden spoon to mix the dough with. Turn on to a floured board, knead lightly, roll it out \( \frac{1}{4} \) of an inch in thickness, and it is ready for use.

**No. 415.—CURRIES (Remarks on).**

Curries are commonly known as dry curries and wet curries. In a dry curry, the meat, after being cooked in the curried sauce, is stirred over a gentle fire until all the sauce has evaporated, great care being taken that the meat does not get burnt in the process. In a wet curry, the meat is served in a small quantity of very thick sauce, and this is the more ordinary way.

Curries to be made in perfection should be of fresh meat, but the ordinary housekeeper seldom wishes to disguise her uncooked meat in this form. If care be taken in the preparation of the sauce, and all the skin, fat, and gristle be removed from meat, or skin and bones from fish, and they be cut into small dice and slowly heated in a well-made sauce, a really palatable curry may be easily obtained from re-
mains of cold meat and fish. Recipes for various curries will be found throughout the book. The amount of curry powder must be increased if a very hot curry is wished, and the difference in the heat of curry powders must also be considered. Personally, I always use Vencatchellum's curry powder; I find it keeps well, and is of excellent flavour.

The border of rice to a curry should be very carefully prepared, so that the grains are separate and dry. If the precise directions given in recipe No. 1025 are followed, this will be attained without difficulty.

No. 424.—CUTLETS (To Cut and Trim).

Choose a nice piece of the best end of neck of mutton or lamb, and have the meat cut to include as many bones as you require chops for the dish. Direct the butcher to saw off the chine and chop through the bones, but do not allow him to divide the cutlets. Have a very sharp knife, and cut the neck into small, neat chops, taking care they are all the same size. Lay each cutlet on its side, take off most of the fat, leaving a thin border round the meat, and trim the cutlets into a nice shape. Make a small cut each side through the fat and skin attached to the top of the cutlet, and scrape the bone quite clean for 1½ or 2 inches down, this is to enable a frill to be slipped round the top of the bone, and it gives the cutlet a smarter appearance.

No. 449.—DISHING UP (Remarks on).

Food is so entirely dependent for its perfection on the way it is dished, and sent to table, that too much attention cannot be given to this point.

A good cook spares no trouble, even with the most ordinary materials to make each dish look dainty and appetising, but this must be done with expedition in serving hot dishes, or food excellently prepared will be entirely spoilt. To dish up really well, a cook must be devoid of hurry and confusion; she should think out all the small details of her requirements, and have them ready to hand before she begins. She should not have to leave a dish of cutlets to look for the frills, or to let the fish cool whilst preparing lemon and parsley. It is well to have all the plates and dishes chosen and polished, and sundries ready quite an hour before dinner is to be served, but care should be taken not to dish up too soon. No dish is improved by waiting, and a young and anxious cook is apt to forget this in her desire to avoid unpunctuality. If everything is made ready in good time, the actual dishing will only take a few moments, and should be postponed until the dishes will be immediately carried to table.

The size of the dishes should be chosen with a view to neatness. Let those for joints be of sufficient size to allow 3 inches clear margin all the way round to the inside rim; on the other hand Irish stew, haricots, etc., should be dished compactly with the gravy poured evenly over. A stew or curry spread over a large dish looks at once slovenly and ill-cooked, whereas the same material carefully arranged can have quite a dainty appearance.

All entrees, and vegetables served as entremets, should be served in entrée dishes, and these are a great help in producing a dainty effect.

With all hot dishes, hot plates must be sent to table, and the dishes also should be made thoroughly hot, those of china being heated on the plate warmer; silver dishes should be half-filled with boiling water, then emptied and polished quite dry with a clean soft cloth. Every possible care should be taken to let all hot dishes be really hot and the cold dishes perfectly cold. Creams and jellies, should be set on
ice whenever practicable, and all food should be set aside to cool in as cold a place as possible.

No. 450.—DRESDEN PATTIES.

Ingredients—

2 French rolls, 2 table-spoonfuls milk, 2 oz. butter.

Method—

Cut each roll crosswise in three pieces of equal thickness, and with a plain round cutter stamp them into rounds about 2 inches in diameter; then hollow out the centre of these, leaving about \( \frac{1}{2} \) inch of bread all round and at the bottom. Put the rounds in a flat dish, and pour the milk on them, a tea-spoonful at a time. (They must not be made too wet or the cases will break.) When they have soaked up all the milk, drain them, melt the butter in a small frying-pan, and fry them for 3 or 4 minutes on each side until they are a light golden colour, then take them out, drain carefully, and fill them with any good preparation of minced chicken and tongue, or oysters, etc., and serve. These are a nice substitute for puff-paste patties.

Time—To fry patty cases, 6 or 8 minutes.

Sufficient for 6 patties.

No. 451.—DRIPPING (To Clarify).

Method—

Cut the dripping into small pieces and put it in a basin; pour on it sufficient boiling water to cover it, and stir well until all the dripping is dissolved. Strain it into a fresh basin, and set it aside to become cold. Remove the dripping from the water and lightly scrape any sediment off the bottom; absorb any water on a clean cloth, and the dripping is ready for use.

No. 452.—DRIPPING (To Clarify, another Method).

Method—

Put the dripping in a saucepan with sufficient hot water to cover it and bring gently to the boil. Simmer it for 2 or 3 minutes, then strain it into a clean basin and set it aside. When cold and firm remove the dripping from the water, and scrape any sediment off the bottom. If drops of water cling to the dripping, absorb them on a clean cloth.

No. 453.—DRIPPING (To use).

All dripping should be clarified before it is used, whether for frying or basting, or in the making of cakes or pastry.

For pastry and cakes use only beef dripping, and this is always to be preferred for frying and for basting poultry and game. Mutton dripping can of course be used for basting all joints of mutton, and it is well to remember not to use the beef dripping for this purpose. Always pour the dripping from the pan into a fresh basin, and set it apart until clarified. For frying, it is best to save the dripping until you have between 2 and 3 lbs, then clarify it altogether, and set it apart in a large basin to be used for frying only. If care is taken it can be used several times. Never mix beef and mutton, or used and unused dripping, and always baste if possible with the same kind as the meat.

If the fat from fried bacon is poured off every morning into a basin, in a week there will be sufficient to baste a fowl or pheasant. Meat can of course be basted over and over again with the same dripping clarified each time, but for basting game dripping can only be used once, and should then be thrown away.

Great care must be exercised at this point or the paste will burn to the bottom of the saucepan and be useless. When the paste is sufficiently done, take it off the fire and mix the strained eggs with it; it should then be a lithe paste but not so soft as to spread. Divide it into pieces 1 inch wide, 4 inches long, and \( \frac{3}{4} \) inches thick, lay them on a baking-tin and bake them in rather a quick oven until they are of a pale golden colour and have risen very much, then spread a thin coating of chocolate icing on each, and put back in a very cool oven for a few minutes until the icing is set. No. 478.—EGGS (To Choose).

Hold the egg to the light, or in front of a lighted gas or candle, and if the egg looks clear it is good, if thick it is stale, and if a black spot is visible it is worthless. Cooks should be exceedingly careful as to the quality of the eggs they employ, as an even slightly tainted egg will entirely spoil an otherwise perfect dish. Eggs served by themselves should if possible be new laid, and very fresh eggs should be chosen for delicate sweets.

No. 479.—EGGS (To use Economically).

However fresh the eggs may be, always break each one separately into a small basin or cup before adding it to others, or to any mixture. If it looks at all doubtful throw it away and wash the cup before breaking another egg into it.

To break an egg, hit it smartly in the middle against the edge of a basin or cup; if you wish to separate the yolks and whites, catch the yolk in half the shell and pour it into the other half over a basin until only the yolk is left. You must do this quickly and carefully or the whites will be specked with yolk.

Many sweets require only the whites of eggs, and it is well to remember in connection with this that custard is always richer made with yolks only; 4 yolks can be used instead of 3 whole eggs, and in this way two sweets can be made to fit into each other. For instance, meringues can be made with the whites left from a rich custard, and a vanilla or any other cream would use the yolks left from a lemon sponge. The cold eggs left from breakfast can be put into boiling water, boiled for 10 minutes, and used for salads or garnishing a chicken in béchamel or a similar dish.

No. 480.—EGG and Breadcrumbs, to.

In all cases where egg and breadcrumbs are directed to be used, the appearance of the dish much depends on the neatness of the cook.
The egg should be well beaten and strained into a small basin. This will be found much more convenient than a flat plate. Anything too large to be dipped into the basin should be brushed over with egg. Have a very clean pastry-brush and set it aside for this purpose. Each time after using wash it thoroughly in very hot water and let it dry before putting it away. Paint the cutlet, or whatever it may be, rather lavishly with egg, and sprinkle the breadcrumbs all over it so that the egg is entirely covered. Breadcrumbs should be made of rather stale bread; they should be sifted and spread out on a plate to dry before they are put away or they will mould. It is very much more economical to have some breadcrumbs always in readiness, as a great deal more of new bread must be used, and then it is often unsatisfactory. Pieces of bread and crusts cut off toast should be dried in the oven, then crushed with the rolling-pin, or in the mortar, and carefully sifted. Keep the breadcrumbs in a tin, and only turn out the quantity you think you will require to use. If you have any left over sift them before mixing them with those in the tin.

Keep breadcrumbs made from the crumb of bread in a separate tin from those made of dried crusts, etc.

2 oz. ham, 1 small onion, 1 small carrot, 1 oz. butter, 2 sprigs parsley, 1 sprig thyme, 6 peppercorns, ½ tea-spoonful salt, 1 pint good stock, 1 wine-glass sherry, 1 small table-spoonful flour.

**Method**—
Melt the butter in a small stewpan, cut the ham, onion, and carrot into small dice, and fry them gently in it for 10 minutes, then pour in the stock by degrees, stirring well as you add it; put in the parsley, thyme, peppercorns, and salt, and stew all gently for ¾ of an hour; mix the flour smoothly with the sherry, stir them into the sauce, and simmer again for 3 or 4 minutes until slightly thickened; skim off all the fat possible, strain through a fine sieve, and it is ready for use. This sauce may with advantage be prepared the day before it is wanted, as the fat can then so much more easily be removed.

**Time**—Altogether 1 hour.

**Sufficient for** 1 pint espagnole.

**No. 519.—FISH (Remarks on).**

The choosing, preparation, and cooking of fish require great care and nicety.

The first thing necessary is that the fish itself should be perfectly fresh and of good quality; secondly, it must be thoroughly cleansed; and thirdly, it must be cooked skillfully, so that it is thoroughly, but not over, done. Fish to be boiled should be put into cold water and brought gradually to the boil, then allowed to simmer gently until tender, when it should be taken up immediately, and served as soon as possible. To keep it hot, if required to wait, leave the fish on the fish-plate across the kettle and cover it with a clean cloth. Dish boiled fish on a hot napkin, and garnish it with very fresh parsley and cut lemon. Lobster coral may be advantageously used sprinkled over the surface of a fine turbot, and cray-fish, fillets of soles, prawns, etc., are used to garnish large fish when more effect is desired.

Fish to be fried should be dried in a clean cloth, then floured and covered with egg and breadcrumbs, or dipped in batter as preferred. Next to oil, lard or refined suet will be found the best for frying fish, but clarified dripping can
be used with satisfactory results. When cooked, the fish must be thoroughly drained on kitchen paper, and garnished with fried parsley. It is as well to serve fried fish on fish-papers as it is apt to stain a damask serviette.

Fish to be broiled must be opened, seasoned, and placed on a gridiron which has been previously warmed and rubbed with suet. A clear fire is imperatively necessary, and great care must be taken not to let the fish be smoked or burnt.

No. 529.—FOIE GRAS (To Serve and Use).

Foie gras should be served in the terrine in which it is bought. This should be placed on a very clean d’oyley, and garnished with a little very fresh parsley. Some small pieces of crisp toast should be placed on the table.

The remains of a terrine of foie gras may be used to great advantage in cooking. Small pieces may be put among the pieces of meat or game in a good pie, or a small quantity may be added to the ingredients of a plain forcemeat, and will, in either case, be found to much improve the flavour of the whole. An excellent savoury can also be made, for which a recipe will be found below.

Cut the foie gras about \( \frac{1}{4} \) inch thick, and lay it on the toast, so as to cover it, but not to come quite to the edge. Sprinkle a very little cayenne or ground pepper over, and make the toast very hot in the oven. Serve very hot, garnished with parsley or small cress.

No. 532.—FORCEMEATS (Remarks on).

Great care must be taken in the preparation of the ingredients for forcemeats, and these should be so perfectly mixed that no flavour unduly predominates. Breadcrumbs should be fresh and carefully sifted, and suet, parsley, etc., must be minced as finely as possible.

The suet, butter, and veal forcemeats are those most usually employed on ordinary occasions, but forcemeats are capable of great variation, and dishes may be much improved by using a suitable and dainty forcemeat. Fillet of veal stuffed with oysters,
partridges with mushrooms, and capons with truffles, are dishes well worth the trouble involved in their preparation. With fish the improvement is, perhaps, even more noticeable. Oyster forcemeat is particularly suitable for stuffed cod, but it will also be found excellent with any baked and stuffed fish, or mushrooms may be substituted with very good effect. For plain forcemeat for fish I prefer one made with butter to that made with suet; a little anchovy may be added when liked. The taste and judgment of the cook will guide her in the selection of a suitable forcemeat for different dishes, and a little forethought will often suggest a pleasing addition to the plain ingredients.

Method—
Choose a young fowl, and have it trussed for boiling. Spread the butter on the bird with a knife. Sprinkle the flour over a very clean cloth, and tie up the bird in it. Put it into a saucepan of hot water, breast upwards, and bring it quickly to the boil. Draw the saucepan aside, and let it simmer gently for about \( \frac{3}{4} \) of an hour. When tender, take it up, untie the cloth, and let it drain for 2 or 3 minutes. Put it into the dish it is to be served in, and cover it with the sauce, which must be very thick. There should be sufficient sauce to cover the dish to the inside rim as well as the bird. Have ready the yolk of a hard-boiled egg, which put in a small sieve, and rub through with a tea-spoon on to the breast of the fowl. Garnish round with parsley, and serve at once. Allowed to remain until quite cold, it makes an excellent luncheon or supper dish.

**No. 564.** FRUIT, JELLY (Summer).

**Ingredients**—

1 quart clear wine jelly No. 243, or No. 670, 9 strawberries, 6 cherries, 1 peach, 1 apricot.

**Method**—

Remove the stalks from the strawberries and cherries, cut the peach into 8 pieces, and the apricot into 6. Have a jelly mould with 6 knobs, into
each of which very gently press a strawberry, pour in a little jelly, just sufficient to form a setting for the fruit, and let it set. When it is firm add more jelly to the depth of an inch. Let that set. Then lay in a cherry or two, a strawberry, and 3 or 4 pieces of peach and apricot. Pour in a little more jelly, but very carefully, or the fruit will float to the top; let this set, and continue in this manner until all the fruit is used, and the mould full. The filling of the mould must be effected extremely gradually, or the fruit will not be evenly distributed throughout the jelly. Care must also be taken that the fruit is not placed too closely together, or the jelly will appear dull and heavy when turned out. In warm weather it is almost imperative to keep the mould on ice, or the jelly will not be firm.

*Sufficient for 1-quart mould.*

**Method**

Remove the stalks from the fruit, put a layer of strawberries at the bottom of a deep glass dish or bowl, sift sugar on them, then put a layer of raspberries and red currants, and build the rest of the strawberries into a cone shape, with the white currants arranged on, and round them. Sprinkle sugar over each layer of fruit, and let it stand. Just before serving, pour the wine over the fruit. The salad should be mixed at table.

Fruit salads can be varied indefinitely, but care should always be taken that only very fresh and fine fruit is used, and the wine should be light, and of good quality. If pine apple is used, the skin should be removed, and each slice cut into quarters.

**No. 567.—FRUIT TURNOVERS.**

*Ingredients—*

\( \frac{1}{2} \) lb. fruit, 3 oz. sugar, puff crust, No. 400, made with 8 oz. flour, and other ingredients in proportion.

*Method—*

Stew the fruit with the sugar until nearly all the juice is absorbed, and set it aside to cool. Roll out the paste thin, stamp it out into rounds with a 4-inch cutter, lay some of the stewed fruit on the half of each, turn the other half over, and press the edges together, wetting them with a little water, or white of egg, to make them stick. Make the half circle neat with the cutter, and bake in a moderately quick oven.

*Time—15 to 20 minutes.*

*Sufficient for 8 turnovers.*

**No. 568.—FRYING (Remarks on).**

There is hardly a more uncommon or valuable quality in a cook than that of being able to fry really well. Success
in this mode of cooking is so entirely a matter of care and trouble, that it is astonishing that pains-taking people should still fail to serve up their fried dishes so as to do them any credit. If a few simple rules are faithfully adhered to, the whole difficulty will be easily overcome.

The first point to be considered is the frying fat, as this is the most important factor. It is absolutely useless to attempt to fry in 2 or 3 spoonfuls of lukewarm grease. At least 2 lbs. of fat should be used, and this must be boiling before the frying-basket is plunged in. On all occasions where it is at all practicable, use the frying-basket. It has a great many advantages, and for small delicate entrées, chipped potatoes, filleted fish or smelts, it is almost indispensable. The fat should be melted in a saucepan (into which the basket will just fit), and brought slowly to boiling-point; a crumb of bread thrown in will brown instantly when the fat is ready for use, and the basket should then be immediately plunged in. If the right quantity of fat is used, the contents of the basket will be covered, and there will be no necessity to turn them when half done, an operation usually fraught with danger to the appearance of the entée. Be very careful that the fat does not burn; once the fat is really boiling, a slight degree of heat is sufficient to keep it so. The same fat may be used by a careful cook over and over again, but it should be clarified each time.

Basins of fat should be kept carefully separate. Fat used for frying fish must be kept for that purpose alone. There should also be a basin of fat reserved for cutlets, rissoles, etc. As I have mentioned before, clarified dripping can perfectly be used, but, if fat is purchased for the purpose, refined suet is an excellent preparation for frying.

For fritters and delicate entremets, a basin of very pure lard should be kept, and carefully strained each time it is used. If the fat should, unfortunately, be burnt, the whole must be thrown away, and the same quantity of fresh substituted, but this accident should be an unusual occurrence.

In dishing up, it should be remembered that frying is boiling in fat, and that draining is quite as necessary after frying as after ordinary boiling. Never turn anything fried straight out of the basket or pan on to a dish; have ready some kitchen paper, and absorb all the grease possible. In taking up the frying-basket, let it drain over the saucepan for a minute, and then turn the contents on to paper. It is well to place the paper on a dish, and let this rest on the kitchen fender, as all fried dishes should be served extremely hot.

Bring all to the boil, and simmer for an hour. Strain the broth (which now will be reduced to about half a pint) into a fresh saucepan. Mix the arrowroot smoothly with the wine, and stir this into the broth. Continue stirring over the fire until nicely thickened, then put in the game, and let it heat slowly by the side of the fire.
Add a seasoning of salt and a little cayenne, and serve very hot.

**No. 570.—GAME PIE.**

**Ingredients**—

Back and hind-quarters of a hare, 1 brace partridges, forcemeat No. 537 or No. 538, puff crust No. 400, made with 1 lb. flour, and other ingredients in proportion, 1/2 pint stock or gravy jelly, 2 hard-boiled eggs, seasoning pepper and salt, yolk of an egg.

**Method**—

Cut the hare into small joints, and each partridge into quarters. Line a pie dish with a thin layer of the forcemeat, then lay in the pieces of hare and partridge, sprinkle them with pepper and salt, and build the pie up in a dome shape, filling the interstices with more forcemeat. Cut the eggs into slices, and lay them round the edge of the pie; pour in the gravy jelly or stock, which must be warmed just enough to become liquid. Moisten the edges of the pie-dish, lay a thin border of crust round, roll out the cover, place it on top, and ornament the edges neatly; brush the pie over with a paste-brush dipped in beaten egg-yolk, and bake the pie in a good oven for about 2 1/2 hours. The pie may be ornamented with leaves of pastry in a wreath or other design when liked. These must be slightly wetted on the under side, and lightly pressed on the cover to cause them to adhere. A buttered paper should be laid over the top of the pie to protect the crust, and the pie must be carefully watched, so that the outside does not take too deep a colour whilst the contents are cooking.

**Time** — 2 1/2 hours.

**Sufficient for** 1 large pie.

---

**No. 571.—GAME (Raised Pie of).**

**Ingredients**—

2 brace of partridges, grouse, or other birds, forcemeat No. 538, raised crust No. 395, made with 1 lb. flour, and other ingredients in proportion, 1/2 pint gravy jelly No. 613, 2 hard-boiled eggs, seasoning pepper and salt, yolk of an egg.

**Method**—

Butter a raised pie-mould and line it with crust, reserving sufficient for the cover. Spread a very thin layer of forcemeat at the bottom of the pie, and place on it some of the pieces of game, which must be cut into small neat joints, sprinkle them with pepper and salt, and build the pie up in a dome shape, filling the interstices with more forcemeat until all the pieces are used. Cut the eggs into slices, lay them round the edge of the pie, and pour in the gravy jelly, which must be warmed just enough to become liquid. Roll out the cover, place it on top, fasten the edges together securely, and ornament them neatly. Make a wreath of small pastry leaves, and decorate the top of the pie with these, slightly moistening their under-side, that they may adhere properly. Brush the pie with a pastry-brush dipped in beaten egg-yolk, and bake in a good oven for 3 hours. A buttered paper should be laid over the top of the pie to protect the crust as soon as the pie is nicely coloured. The pie should be left in its mould until cold, when the mould must be carefully undone and lifted away, and the pie garnished with very fresh parsley before it is sent to table. If liked, the lid of the pie may be removed, and replaced by a thick layer of very fresh and delicately made aspic, lightly chopped.

**Time** — 3 hours.

**Sufficient for** 1 large pie.
No. 572.—GAME (Rissoles of).

Ingredients—
Remains of cold game, ½ pint stock, ¼ small onion, ½ oz. butter, the yolks of 2 eggs, seasoning salt and cayenne, 1 egg, breadcrumbs, frying fat.

Method—
Carefully remove all skin and fat from the game, and chop it finely. Cut up the onion, and fry it with the butter for 5 or 6 minutes. Strain off any fat, add the bones and skin of the game, and cover with the cold stock. Stew this for 1 hour. Then strain the broth into a fresh saucepan, and boil it rapidly until reduced to ¼ of a pint. Take it off the fire and let it cool for 5 or 6 minutes. Beat and strain the yolks of 2 eggs and add them to it. Mix well, add the game and seasoning, and stir all over the fire until the sauce is very thick, but do not allow it to boil, or it will curdle instantly. Set it aside to cool in a basin, and when cold, make it into small rolls about 2½ inches long and 1 inch deep. Dip these into beaten egg, cover them with fine breadcrumbs, and arrange them in a frying-basket. Have ready a saucepan of boiling lard or refined suet, plunge the basket into this, and fry the rissoles a light golden-brown. Turn them on to kitchen paper to drain, and serve on a hot napkin, garnished with fried parsley.

Time—To make gravy, about 1½ hours.
To cook mixture, 10 to 15 minutes.
To fry rissoles, 6 or 7 minutes.

Sufficient for 8 or 10 rissoles.

Method—
Take all the flesh off the birds, and set it aside. Melt the butter in a stew-pan, and fry the onion in it for 7 or 8 minutes; pour off all fat, add the bones and trimmings of the game, cover them with the cold stock, and stew gently for 3 hours; then strain, and set aside to cool. When cold, skim off every particle of fat, and heat the stock in a fresh saucepan. Mince the meat and pound it and the breadcrumbs together in a mortar, moistening them with one or two spoonfuls of game stock, then stir this into the hot stock; add the wine and arrowroot smoothly mixed, and stir all until the soup is nicely thickened, when season with a little salt and cayenne, and serve.

Time—To make stock, about 3 hours. To heat and thicken soup, 10 to 15 minutes.

Sufficient for 3 or 4 persons.

No. 574.—GARNISHING (Remarks on).

Garnishing, in general, must be simple in design and colouring, and care should be taken that it is not overdone. Parsley and cress are most used, and these should be perfectly fresh and well washed. Boiled fish should be garnished with fresh, and fried fish with fried parsley. Lemons cut into thin slices or small devices are suitable with both. Lobster-coral alternated with fresh parsley is an effective garnish to turbot, and the coral may also be used to form a design on the fish.

Roast chickens and fowls should be garnished with watercress. Boiled fowls covered in sauce look well with hard-boiled yolk of egg rubbed through a fine sieve on to the breast of the bird. Game need not be decorated. Joints of boiled or braised beef and mutton should have small heaps of the vegetables cooked with them, carefully arranged round the dish.
The decoration of hot dishes must, of course, be quickly done, that the meat may not cool during the process. In garnishing cold dishes a little more latitude may be allowed, and time is then not so much an object. Beef should be garnished with little heaps of scraped horse-radish and sprigs of fresh parsley. Aspic, in croûtons, or chopped, may be employed to garnish all cold meats with good effect. In garnishing sweets, such as trifles, a great deal may be done by the dainty combination of colour to be obtained from angelica, glacé cherries, and apricots, etc. Natural taste is necessary, but a little care and trouble will be well repaid. More precise directions for garnishing various dishes will be found included in the recipes for them.

Then cork the bottles carefully with new corks, which must be previously soaked in boiling water for 10 minutes to cause them to shrink, drive the corks firmly in, and tie them down with stout twine. **No. 607.—GRAVIES (Remarks on).**

Directions for making gravy from the tin for roast meat are given below, and this is the most satisfactory method to employ for beef, mutton, etc. Poultry and game must have a little gravy made separately, either prepared from the trimmings of the birds, or from a little fresh meat, unless there is some light stock in the larder when that may be used instead. Gravy for game should, if possible, be made from the trimmings and bones of a bird prepared for a previous meal.

In households where game is frequently eaten, there is generally a carcass and trimmings of some game bird, which, stewed down with a few vegetables, would produce a small quantity of well-flavoured gravy for the fresh bird.
Gravies should never be thick, but should very lightly coat the spoon. A small quantity of arrowroot should be used for the purpose of giving a slight consistency to the gravy. It is more delicate and lighter than flour, and also gives a clear, transparent look to the gravy. All gravies must be absolutely free from fat.

No. 608.—GRAVY, BROWN.

Ingredients—
1 lb. shin of beef, 2 oz. lean ham, 1 oz. butter, 1 small onion, 1 carrot, 1 sprig parsley and thyme, 6 peppercorns, \( \frac{1}{2} \) tea-spoonful salt, 1 pint water, 1 small tea-spoonful arrowroot.

Method—
Melt the butter in a stewpan. Cut the ham, onion, and carrot into dice, and stir them over the fire until well browned. Pour off any butter remaining and add the shin of beef, cut into small pieces, and the seasonings, pour in the water, bring all to the boil, and simmer gently for 2 hours. Strain through a sieve, and set aside to cool. When cold, carefully remove all the fat, and heat the stock to boiling-point. Mix the arrowroot with a table-spoonful of cold water, stir this into the stock, and boil the gravy for 2 or 3 minutes until nicely thickened. Add 2 or 3 drops of browning, if necessary, to give a rich colour, and the gravy is ready for use.

Time—To fry ham and vegetables, about 10 minutes.
To simmer stock, 2 hours.
To heat and thicken gravy, about 10 minutes.

Sufficient for 1 pint of gravy.

No. 609.—GRAVY, BROWN (Without Meat).

Ingredients—
1 oz. butter, 1 medium sized carrot, 2 small onions, 1 sprig parsley, 6 peppercorns, 1 salt-spoonful salt, 1 tablespoonful flour, a few drops browning, 1 pint water.

Add the parsley, pepper, and salt, pour in the water, and boil all together for an hour, by which time the gravy should be reduced to \( \frac{3}{4} \) pint. Strain the gravy through a fine sieve, colour a rich brown with a few drops of browning, and serve very hot.

Time—Altogether, 1 hour and 10 minutes.

Sufficient for \( \frac{3}{4} \) pint gravy.

Method—

Cut the neck of the fowl into several pieces, and chop the carrot small. Brown these together in the butter, pour in the water, add the peppercorns and other seasonings, and stew all together for 1 hour. The gravy should, by then, be reduced to \( \frac{1}{3} \) a pint. No. 614.—GRAVY (For Roast Joints).

Sufficient gravy for the joint can generally be obtained by straining off all the dripping in the tin in which the meat was cooked, adding, according to the size of the joint, from \( \frac{1}{4} \) to \( \frac{1}{2} \) pint of really boiling water with a pinch of salt, and stirring them well together. The gravy thus obtained should be strained round, but not over the joint, and the meat sent to table instantly. Great care must be taken to pour off all the dripping, or the gravy will be greasy, and the cooling fat will cake round the spoon and the inside of the dish before the joint is removed from table. This always gives a slovenly and unappetising appearance to the meat, and is entirely unnecessary if care be taken.

No. 615.—GRAVY, ORANGE (For Wild Duck).

Ingredients—

\( \frac{1}{2} \) pint of brown gravy No. 612, 1 wine-glassful port, the rind of \( \frac{1}{4} \) a Seville orange, a small lump of sugar, a very little cayenne pepper, \( \frac{1}{4} \) tea-spoonful arrowroot.

Method—

Boil the gravy for 5 minutes with the orange rind and the sugar. Take out the orange rind, mix the arrowroot and port smoothly together, add them to the gravy with the cayenne, and
boil altogether for 3 or 4 minutes until slightly thickened. Then strain, and serve very hot.

**No. 645.—HARE (Baron of).**

**Ingredients—**

1 hare, 1 pint milk, 2 oz. butter, or 1 lb. clarified dripping, 1 pint brown gravy.

**Method—**

This is a useful way of serving a hare when the family is small. Have the hare carefully skinned and paunched, and cut it almost in half behind the shoulders. The front part of the hare is not required for this dish, and will make another excellent dish if carefully juggled with the remains of the baron. Make the hindquarters into as compact a joint as possible, running a thin skewer through the legs to keep them close to the body, and securing them with tape if necessary. Put the hare in a baking dish and roast it carefully, basting it constantly, either with milk or with clarified dripping. If cooked with
milk, use the butter to finish with when the milk is nearly used up. Serve on a very hot dish, with some of the gravy poured round the hare and the rest in a sauce-boat, and send barberry or red-currant jelly to table with it.

Time—1 hour.
Sufficient for 3 or 4 persons.

No. 646.—HARE (Jugged).

Ingredients—
1 hare, 2 onions, 6 cloves, 1 lemon, 1 oz. flour, 1/2 tea-spoonful pepper, 1 tea-spoonful salt, 1/2 tea-spoonful mixed sweet herbs, 6 peppercorns, pinch mixed spice, a little nutmeg, 1 pint burgundy or port, 1 pint stock, forcemeat No. 537.

Method—
Wash the hare and cut it up into neat joints. Mix together the flour, pepper, salt, and herbs, and dip each piece of hare into the mixture. Put these into a deep jar, with 1 onion peeled and stuck with cloves, and the other chopped small; add the lemon, peeled and cut in half, and the peppercorns and spices, and pour over all 1 pint of good stock and 1/2 pint of burgundy or port. Tie the jar down tightly, and stand it in a moderate oven, or in a stewpan of boiling water. Make the forcemeat, divide it into small balls and fry them, and 20 minutes before serving add these and the wine to the hare. Dish the hare on a very hot dish, arrange the pieces neatly, take out the whole onion and the lemon, and pour the gravy over. Serve barberry or red-currant jelly with this dish.

Time—2 hours.
Sufficient for 4 to 6 persons.

No. 647.—HARE (Jugged, another Recipe).

Ingredients—
Remains of cold hare, 2 small onions, 6 cloves, 1 oz. flour, 1/2 tea-spoonful pepper, salt, and mixed herbs, 1/2 lemon, 1 pint stock, 1/2 pint burgundy or port, forcemeat No. 537.

Method—
Use a hare of which only a small portion has been eaten. Cut up the remainder into neat pieces, dip these into the mixed flour, pepper, salt, and herbs, and put them into an earthenware jar, with 1 of the onions stuck with cloves and the other chopped small, add the 1/2 lemon peeled, and pour the stock over all. Tie the jar down securely, and stand it in a moderate oven, or in a stewpan of boiling water. Make the forcemeat, divide it into small balls and fry them, and 20 minutes before serving add these and the wine to the hare. Dish the hare on a very hot dish, arrange the pieces neatly, take out the whole onion and the lemon, and pour the gravy over. Serve barberry or red-currant jelly with this dish.

Time—2 hours.
Sufficient for 4 to 6 persons.

Ingredients—
1 hare, forcemeat No. 537, 1 lb. clarified dripping for basting, 1 pint brown sauce No. 217.

Method—
Have the hare carefully skinned, cleaned, and trussed, and wash it well in warm water. Fill it with forcemeat, place it on a baking-tin, and put the dripping on and round it. Bake in a moderate oven, basting constantly until done. The oven must not be too hot or the hare will taste dry.
Serve on a very hot dish with some of the brown gravy, boiling hot, poured round the hare, and the remainder served in a sauce-boat. Send red currant or barberry jelly to table with this dish.

**Time**—1½ to 2 hours, according to size.  
**Sufficient for** 4 to 6 persons.

**Method**—

Put the pounded meat into a clean saucepan, strain the boiling soup on to it, stir well, and simmer for 3 or 4 minutes. Mix the arrowroot smoothly with the port, stir this and the red-currant jelly into the soup, and continue stirring over the fire until the soup is rich and thick, put in the forcemeat balls, simmer for 1 minute, and serve very hot.

Cut the meat into small thick chops, and trim off nearly all the fat. Cut the onion into dice, and the carrot and turnip into thin slices. Melt the butter or dripping in a stewpan, and fry the onion in it until it is quite brown; then dredge in the flour, and stir them over the fire until they form a smooth, brown paste. Add the water, a little at a time, stirring as you add it. Then put in the chops and seasoning, and bring all to boiling point. Add the carrots and turnips, and simmer all gently for
2 hours. Dish the chops neatly in a hot dish with the vegetables round. Keep them hot, boil the gravy rapidly for 3 or 4 minutes, add a few drops of browning, if necessary, to make it a rich brown colour, strain it over the chops, and serve.

No. 658.—HORS D’ŒUVRES.

There is very little to be done to hors d’oeuvres, except to arrange them with taste and neatness. White china dishes, divided into small compartments are often used when two or three different things are served. If only one, a small oval flat china dish is the most suitable. Great nicety is necessary in the slicing of sausages or tongue, and these should be garnished with tiny sprigs of parsley. Anchovies and sardines should be carefully drained and arranged cross-wise in a lattice work, with little heaps of capers decorating the end of the dish. Lax, caviare, olives, etc., can be tastefully arranged in separate compartments or dishes, garnished with parsley or fresh cress. Very fresh crusty rolls and small pats of the best butter must always accompany hors d’oeuvres. In summer the butter should have been iced.

Mix it with the cream and salt, and add the vinegar, a very little at a time, mixing it well in. No. 660.—ICES, or ICE PUDDING
(To make without a Freezing Machine).

Ingredients—
3 lbs. ice, 1½ lbs. common salt.

Method—
Break the ice into small pieces, and crush the salt, and mix them well together in a zinc bowl. Put the mixture to be frozen into the freezing-pot, or if you do not possess one, into a glass tankard jug, and set the vessel into the ice and salt, taking care that the freezing mixture comes well up the sides. Stir the mixture constantly until it begins to set. If ice is being made, it is only necessary to wait until the ice is sufficiently firm to be moulded with a spoon into the ice-glasses. If, on the other hand, ice pudding is required, the ice must be taken out of the freezing-pot as soon as it is slightly set, and put into the mould; the lid must be fastened on the mould, a piece of writing-paper being placed between the ice and the lid, and the mould completely buried in the ice and salt. Ices of any description must, of course, only be dished at the moment they are required for use.

Puff-paste No. 400, made with 8 oz. flour, and other ingredients in proportion, \( \frac{1}{2} \) lb. jam.

Method—
Roll out the paste about \( \frac{3}{4} \) inch thick, and with a round fluted cutter, about 2 inches across, stamp out 12 rounds of paste. No. 677.—JELLIES (Remarks on).

Great care must be taken with jellies that they are of such a consistency as to be firm enough to retain their shape without possessing any gluey taste or solidity of substance. Where fresh fruits are used in making the jelly, care must be taken that the delicate flavour of the fruit is not impaired by too long boiling. 1 oz. isinglass of good quality to a quart mould should make a perfect jelly, light and delicate, but quite firm enough to retain its shape. In summer the jelly should be set on ice, if this is not obtainable an additional \( \frac{1}{4} \) oz. of isinglass must be used. Jelly made from stock care-

fully prepared from calf's feet is always to be preferred when obtainable, but very good results are possible from isinglass with very much less time and trouble. Jellies should be made at least six hours before they are required. It is well to make them the day before when convenient. In either case they should be set on ice before serving.

No. 678.—JELLIES AND CREAMS (To Turn Out).

Method—
With the point of a knife loosen the edge of the jelly or cream all the way round the mould, taking great care not to injure the shape. Then dip a cloth into boiling water, wring it out lightly, and wrap the mould in it for a few seconds, see that the heat touches all the knobs, then lay the dish over the top of the mould very exactly, reverse the dish and mould, give a slight downward jerk, and lift the mould off carefully. If there should be any liquid jelly or cream in the dish, mop it up with a very clean cloth wrung out of boiling water, and dry the dish with a very clean cloth.

Jellies and creams should only be turned out immediately before they are wanted. They should be set in ice always when procurable.

No. 679.—JELLY (à la Bacchante).

Ingredients—
1 lb. Muscatel grapes, \( \frac{2}{3} \) pint hot water, 1 oz. isinglass, 4 oz. sugar, rind of \( \frac{1}{2} \) a lemon, juice of 1 lemon, whites and shells of 2 eggs, 1 wine-glass water, 1 pint champagne.

Method—
Pick the grapes from their stalks, and reserve 18 of the finest to set in the jelly. Put the rest in a bowl, and crush them with a wooden spoon to extract the juice. Put the water, isinglass,
lacking sugar into a 1
lined saucepan, and simmer for 10
minutes. Then take it off the fire and
let it cool for 5 minutes. Beat the
whites and shells of the eggs together
with the cold water, add the crushed
grapes and their juice, and stir this
into the jelly until it simmers. Then
take out the spoon, and let it boil gently
for 8 minutes. Let it stand for 5
minutes, then strain it through a jelly-
bag. If the jelly does not look perfectly
clear and bright, strain a second time.
When cool, but still liquid, stir in the
champagne. Have ready a well-wetted
mould with knobs. Put a grape into
each knob, and with a spoon pour in
sufficient jelly to cover them completely.
Set this on ice, and as soon as it
becomes firm put in another 6 grapes
and sufficient jelly to rather more than
half fill the mould. Let this set again,
then put in the rest of the grapes and
jelly, and set the mould in ice for at
least two hours before serving.
_Sufficient for 1-quart mould._

the broth should be reduced to 1½ pints.

LOBSTERS (TO CHOOSE)—LOBSTER (CUTLETS OF)

Fry them crisply. Lift out the bacon, and keep it very hot. Cut the liver into slices, \( \frac{1}{4} \) inch in thickness, mix the dessert-spoonful of flour with the pepper and salt, dip each piece of liver in this, and fry it in the fat from the bacon. Dish the liver and bacon carefully, pour the sauce over, and serve immediately.

**Time**—To fry bacon, 5 minutes. To fry liver, 10 minutes.

**Sufficient for** 4 or 5 persons.

No. 747.—LOBSTERS (To Choose).

Lobsters, if bought alive, should feel heavy for their size, and be full of motion. If freshly cooked they should be very stiff, and the tails much curved inwards. Cooked lobsters should also feel heavy. The hen lobster is much prized on account of the coral, which is very valuable for garnishing and for use in sauces.

No. 748.—LOBSTERS (To Boil).

**Method**—

Have ready a large pan of fast-boiling water, salted in the proportion of 4 oz. salt to 1 gallon water. Throw in the lobsters one at a time, and be sure the water is really boiling, so that life may be destroyed instantly. To put on lobsters merely in hot water is a barbarous, unnecessary, and inexcusable cruelty, as their flavour is by no means improved by this method of cooking.

**Time**—Small lobsters, 15 minutes. Medium size, 20 to 30 minutes. Large lobsters, 30 to 45 minutes.

No. 749.—LOBSTER (au Béchamel).

**Ingredients**—

1 large or 2 small lobsters, \( \frac{1}{2} \) pint béchamel sauce No. 137, or melted butter No. 227, juice of \( \frac{1}{2} \) a lemon.

**Method**—

Take the flesh from the claws and tail, and cut it into dice, and pound the coral in the mortar. Heat the béchamel in a lined mortar, add the coral, and stir over the fire until the sauce is smooth and pink. Add the pieces of lobster with the lemon juice, and let it heat slowly by the side of the fire for 20 minutes. Serve very hot.

If there should be no coral to the lobster, use a few drops of cochineal to colour the sauce a delicate pink.

**Time**—To heat lobster, 20 minutes.

**Sufficient for** 3 or 4 persons.

No. 750.—LOBSTER (Curried).

**Ingredients**—

1 lobster, or the remains of cold lobsters, 1 tea-spoonful curry powder, 1 tea-spoonful flour, \( \frac{1}{2} \) pint curry sauce No. 416.

Cut up the flesh of the lobster into small, neat pieces, and rub each piece in the curry powder and flour mixed. Have ready \( \frac{1}{2} \) pint of curry sauce very hot, put in the lobster, and let it heat slowly through by the side of the fire.

**Time**—To heat lobster, 20 minutes.

**Sufficient for** 2 or 3 persons.

Plunge the basket into a saucepan of boiling fat, and fry the cutlets a delicate golden brown. Make \( \frac{1}{4} \) pint of lobster sauce, using the claws.
and soft creamy parts of the lobster. Dish the cutlets in a circle, pour the sauce in the centre, and serve very hot. 

**Time**—To fry cutlets, 6 or 7 minutes. 

**Sufficient for 3 or 4 persons.**

No. 779.—MARASCHINO JELLY
(With Strawberries).

Ingredients—

18 strawberries, 3 table-spoonfuls
maraschino, 1 dessert-spoonful of
brandy, 1 oz. isinglass, 1 1/2 pints hot
water, juice of 2 lemons, rind of 1
lemon, 5 oz. sugar, whites and shells
of 2 eggs, 1 wine-glass cold water.

Method—

Put the isinglass in a lined saucepan
with the water, strained lemon juice,
thinly-peeled lemon rind, and the
gum, let them remain for 1/2 of an hour
until the sugar is melted, then beat the
whites and crushed shells of the eggs
with the wine-glassful of cold water, and
add them to the other ingredients; heat
all to boiling point, stirring occasionally
until it boils, but do not touch it after-
wards. Simmer gently for 10 minutes,
then strain through a jelly-bag, which
has previously been wrung out of hot
water, pouring back what first runs
through should it not be perfectly clear,
add the maraschino and brandy, and
set it aside to cool. Soak a mould
with knobs in cold water for half
an hour, drain it carefully, press
a strawberry gently into each knob,
pour in a little jelly, just sufficient
to form a setting for the fruit, and
let it set. When it is firm, add more
to the depth of an inch. Let that
set. Then lay in 3 or 4 more straw-
berries. Pour in a little more jelly
(but very carefully, or the fruit will
float to the top), let this set, and con-
tinue in this manner until all the fruit
and jelly is used. In warm weather
it is almost imperative to keep the
mould on ice, or the jelly will not be
firm. If ice cannot be obtained an
additional 1/2 oz. of isinglass must be
used.

Sufficient for 1-quart mould.

No. 780.—MARASCHINO JELLY

Method—

Slice the onion thinly, add the
minged parsley and lemon rind, and

two before using. Cutlets and all

Time—30 to 40 minutes.
Sufficient for 6 or 7 persons.

No. 788.—MENUS (To Arrange).

The sequence of the courses remains the same, however many or few there may be, I therefore give the order in which they are served for a complete dinner.

HORS D’ŒUVRES.
SOUPE.
FISH.
ENTRÉES.
ROAST.
ENTREMETS.
GAME.
SWEETS.
SAVOURY.
ICE PUDDING.
DESSERT.

Some of these courses can, with advantage, be omitted in giving a small dinner. The excellence of each individual dish should be considered of much greater importance than the number and variety of things put on the table.

In summer, game can be well replaced by roast chicken or capon, served with a very fresh salad and a well-cooked entremêt of asparagus; broad or French beans is always acceptable.

As a general rule, 4 or 5 well-cooked and carefully-chosen dishes, form the most agreeable dinner. It should be remembered that game invariably comes immediately before the sweets, however long or short the dinner. At a formal dinner vegetables are
handed separately only with the joint. In selecting dishes, two roast courses should not be given, therefore with game braised or stewed meat is usually served. If two entrees are given they should be of different colours, 1 white and 1 brown.

No. 789.—ME RINGUES.

Ingredients—
Whites of 4 eggs, ½ lb. castor sugar, ½ pint cream, 1 dessert-spoonful brandy.

Method—
Have ready some thin boards, and lay on them pieces of writing-paper, 4 inches long and 3 inches wide, covered with a sprinkling of sugar, to protect the bottom of the meringues. Whisk the whites of the eggs, which should be very fresh, to as stiff a froth as possible, then mix in the sugar quickly with a wooden spoon, and very expeditiously lay the mixture in dessert-spoonfuls on the papers, using a second dessert-spoon to slip the mixture out of the spoon, and forming each one into the shape of an egg. Sift a little sugar over, and bake the meringues about 20 minutes in rather a quick oven until they are crisp on the outside and very lightly browned; then reverse the meringues, gently remove the papers, and scoop out the soft insides with a tea-spoon, leaving a hollow shell about ¼ inch thick. Replace them in a very cool oven, and let them dry slowly until crisp throughout, then set them aside to cool. When wanted for table whip the cream to a stiff froth, add the brandy, and put a spoonful in each half of the meringue, stick two together, the cream will bind them sufficiently if a very little is spread on the rim, pile them in a silver or glass dish, and serve.

Time—To bake meringues, 20 minutes. To dry them in very cool oven, ½ an hour.

Sufficient for 6 or 7 meringues.

No. 790.—MERINGUE (Fruit).

Ingredients—
1 lb. cold stewed fruit, whites of ¾ eggs, 6 oz. castor sugar.

Method—
Arrange the fruit at the bottom of a pie-dish, putting in but little of the syrup, whisk the whites of the eggs to as stiff a froth as possible, mix the sugar with them, and cover the fruit equally with a smooth layer of the meringue, sift sugar on, and bake ⅔ an hour until lightly browned.

Time—In moderate oven, ⅔ an hour.

Sufficient for 4 or 5 persons.

No. 791.—MERINGUES PISTA-CHIO.

To heat the glasses, dip them in very hot (not boiling) water, drain them quickly, and dry them with a very clean hot cloth.

Time—15 to 20 minutes.

**No. 814.—MUTTON (To Choose).**

It will be noticed that all the recipes given are calculated for **small** mutton, *i.e.* Southdown or Scotch, a leg of which averages in weight about 7 lbs. This is always to be preferred when the number in family does not necessitate very large joints. For excellence of flavour no mutton can excel the Welsh, and these little joints are most convenient for families of 2 or 3 persons. Legs can be bought as small as 4\( \frac{1}{2} \) lbs., and all the joints are worth the extra price paid when a small delicate joint is required. Large mutton should be carefully cooked, so that it is done throughout without being burnt outside.

**No. 815.—MUTTON, BREAST OF (and Caper Sauce).**

**Ingredients**—

2 or 3 lbs. breast of mutton, \( \frac{3}{4} \) pint caper sauce No. 260.

**Method**—

Cut off some of the fat, and put the mutton into a stewpan with sufficient water to cover it. Bring gently to the boil, and let it simmer gently until done. Make the caper sauce as directed, letting it become rather thick. Take out the mutton, drain it, and place on a very hot dish. Cover it completely with the sauce, and serve.

Cut off some of the fat, and bone the meat carefully. Spread the force-meat on the meat, roll it up and tie it securely with tapes. Roast it in front of a good fire, or in a rather hot oven, and keep it well basted. When cooked take it up, untie the tapes, and serve the joint on a very hot dish, with a little clear gravy poured round.

**Time**—1 hour.

**Sufficient for** 3 or 4 persons.

2 lbs. scrag of mutton, small teaspoonful salt, 6 peppercorns, 3 pints water.

When required for use take off every particle of fat, and heat up as much as will be taken at one time.

If the patient is allowed vegetables, the addition of a carrot, small onion, and sprig of parsley will much improve the flavour of the broth.

**Time**—4 hours.

**No. 824.**—**MUTTON CUTLETS** *(Remarks on).*

Endless recipes could be given for the various forms of serving this dish, but as the difference is not in the cooking of the cutlets, but in the choice of the vegetable or sauce which accompanies them, I have avoided unnecessary repetition, and given merely a few suggestions. The vegetable or purée should be arranged in the form of a pyramid for the cutlets to rest against. Sauce should be poured round the cutlets, which should be neatly arranged, standing in the centre of the dish.

Cutlets plainly fried No. 821, or Marinaded No. 822, can be served with

No. 826.—MUTTON, FOREQUARTER OF (To Use).

This is a very advantageous way of buying mutton when the housekeeper has a cool larder. If the forequarter is carefully divided, it can be made to provide 4 hot dishes at small expense. A forequarter of small mutton weighs from about 11 lbs. to 15 lbs. Cut off the shoulder and hang it up, as this will keep the longest. You have then left the best end of the neck, the breast, and the scrag end of the neck. The breast can be boiled with caper sauce, or stuffed and rolled. The neck can be roasted, used for cutlets, or boiled. The scrag end can be made with care into an excellent haricot or Irish stew, and the shoulder roasted, or cooked in any way preferred.

Lay two or three pieces of fruit in the mould, pour in a little jelly, enough to form a setting for the fruit, and let it set. When it is firm, add more jelly to the depth of an inch. Let that set. Then lay in another piece or two of nectarine, add a little more jelly, and continue in this manner until all the fruit is used, always letting each layer of jelly set before more is added. Set aside until firm. In warm weather it is almost imperative to keep the mould on ice, or the jelly will not set.

thick and begins to whiten. Then add the lemon juice, and stir constantly over a quick fire for a few minutes. Try it constantly by dropping a little into a basin of cold water, and, as soon as it solidifies immediately, and snaps between the teeth, take the pan off the fire and stir in the almonds. Have ready a baking-tin very lightly buttered, pour in the almond rock, spread it out evenly, mark it in divisions, and cut up into slabs as soon as it is partly set.

Method—
Put the isinglass into a lined saucepan with the hot water, strained lemon juice, rind, and the sugar, and let them remain for 15 minutes, then beat up the whites and crushed shells of the eggs with a wine-glassful of cold water, add these to the saucepan, and bring all to boiling point, stirring occasionally. Take out the spoon, and leave the jelly to simmer for 10 minutes. Strain through a jelly-bag, which has previously been wrung out of hot water, and let it run through a second time should it not be perfectly clear. Add the noyeau, and set it aside to cool. Stone the apricots, and divide them into 4 pieces. Put 5 or 6 pieces at the bottom of a well-wetted mould. Pour in sufficient jelly to cover them, and set it aside. When firm, add more fruit and jelly, and set aside again, and do this until all is used and the mould full. Then set it on ice until required for use.

Take a small and very sharp knife, peel the olives round and round, in the the form of a corkscrew, until the stone is reached. Be careful not to cut too quickly, or you will probably break them; if handled carefully, the place of the stone may be filled, and the olive retain its own shape.

No. 855.—OMELETS (Remarks on).

In making omelets, be careful not to let the mixture be too much spread. A small round frying-pan is the most suitable for cooking them in. Great care must also be taken not to let the omelet burn; it should be cooked over a gentle fire, and stirred unceasingly until it sets. Where a gas cooker is used, the toaster will be found to answer admirably for cooking omelets. Place the omelet on the top of the toaster, stir it for 3 or 4 minutes, then take out the spoon, and hold the frying-pan underneath the red-hot grid for 1 or two minutes. This is the most perfect way of cooking omelets. Too much expedition in serving cannot exist; the omelet should not be put in the pan until the maid is ready to carry it straight to the dining-room as soon as it is finished.

The juice of 6 oranges, of which 2 should be Seville oranges, thinly-peeled rind of 2 oranges, juice of 2 lemons, rind of 1 lemon, 1 tablespoonful brandy, 1 oz. isinglass, 1 1/4 pints hot water, 3 oz. sugar, whites and shells of 2 eggs, 1 wine-glassful cold water.

**Method**

Put the isinglass in a lined sauce-pan with the hot water, let it soak 10 minutes, then add the sugar, strained orange and lemon juice, and very thinly-peeled rinds. Beat the whites and shells of the eggs with the wine-glassful of cold water, and add them to the other ingredients. Heat all slowly to boiling point, stirring occasionally, but do not touch it after boiling has commenced. Simmer for 10 minutes, then let stand 5 minutes, and strain through a jelly-bag, which has been wrung out of cold water, straining a second time what first passes through should it not look perfectly clear. Add the brandy, pour the jelly into a mould that has been well-wetted with cold water, and set it aside to become firm.

*Sufficient for* 1-quart mould.

**Ingredients**

2 1/4 lbs. Seville oranges, 6 lemons, 28 lbs. sugar, 6 quarts of the water they are boiled in.

**Method**

Well wash the oranges and lemons, and rub them with a very clean wet cloth until any blackness is removed. Boil them in sufficient water to cover them for 2 1/2 to 3 hours until they are perfectly tender, then take them out; halve the fruit, remove all the pulp with a silver or wooden spoon, and take out every pip with a couple of forks or a tea-spoon as preferred. Cut the rinds into very thin chips with a silver knife. While cutting up the fruit, boil the sugar and 6 quarts of the water the oranges were cooked in for 1/2 an hour, then add the pulp and cut-up rinds, and boil the marmalade rather fast for about an hour, skimming it well, and stirring constantly until the marmalade sets when a little is tried on a plate. OX TONGUE (POTTED)—OYSTERS (CURRIED) 219

cold, melt the glaze, and brush it over in every part, giving the tongue a second coat as soon as the first is dry. Melt the aspic, and pour it into a slightly buttered tin or dish to the depth of \( \frac{3}{4} \) an inch, and put it aside to set. When firm, turn it out on to the pastry-board, and stamp out as many croûtons as you can with a cutter, collect the trimmings, and chop them small with a very sharp knife. Lay the ox tongue in the dish in which it is to be served, garnish it with the croûtons and chopped aspic and some very fresh parsley, and serve.

No. 879.—OX TONGUE (Potted).

**Ingredients**—
1 lb. cold cooked ox tongue, 6 oz. cold roast veal, 6 oz. butter, a pinch of cayenne.

**Method**—
Remove all skin and fat from the tongue and veal, and chop them coarsely, then turn them into the mortar, and pound them to a perfectly smooth paste, gradually adding the butter; season with cayenne, and be careful that no unpounded portions remain. Press the meat into small jars, pour over a thin layer of clarified butter to exclude the air, tie down carefully, and keep in a cool place.

The addition of the roast veal is rendered necessary by the softness of the tongue, which pounded by itself would not be successful.

*Sufficient for 1 1/2 lbs. potted meat.*

No. 880.—OYSTERS (To Serve).

Oysters should be opened with a proper oyster knife, by inserting the point at the juncture of the two shells, and pressing firmly with an upward movement. The oyster must then be detached from its shell and transferred into the upper or deeper shell, care being taken during the process not to lose the delicate liquor which will be found in the shell. From 4 to 6 oysters should be arranged on each plate, which should be put in the diner’s place before the guests enter the dining-room. Thinly cut brown bread and butter and cut lemon must be served with them.

Oysters must only be opened a very short time before they are intended to be eaten.

Open the oysters, wash them in their own liquor, put them into a lined saucepan, and strain their liquor over them. Heat them slowly to boiling point, but do not let them boil, take them out, remove their beards, and set the oysters aside in their liquor. Mix the flour, curry powder, and salt very smoothly with the milk or stock, add this to the onion, and stir until it is quite smooth and very thick. Stir in the oyster liquor gradually, and simmer until the sauce has again thickened, then draw it back from the fire, put in the oysters and lemon juice, mix well, and let them heat at the side of the fire, taking care that they do not boil. **No. 903.—PASTRY (Remarks on).**

Care, a light cool hand, and a well-managed oven, render the making of good and wholesome pastry a simple matter. All the materials must be perfectly good of their kind, whether butter, dripping, or lard is used. Short crust made with a moderate proportion of butter is preferable for ordinary fruit tarts, as being much more wholesome than richer crusts.

In making puff crusts, two things should be noted, the condition of the butter must be very cold and firm, and a good steady heat must be maintained in the oven the whole time of cooking. In summer, puff paste must be kept over ice in the intervals between rolling. For all pastes, use a wooden spoon to mix with, and proceed with as much expedition as possible.

**No. 904.—PASTE (Feuillette.)**

**Ingredients**—

1 lb. finest Vienna flour, 1 lb. fresh butter, ½ tea-spoonful salt, yolks of 2 eggs, about 7 or 8 table-spoonfuls of very cold water.

**Method**—

Put the flour in a bowl with the salt, rub in 1 oz. of the butter, make a hole in the centre of the flour, put in the yolks of the eggs, first carefully removing the specks, and add just sufficient very cold water to make a firm, smooth paste, using a wooden spoon to mix with. Turn the paste on to a floured board, and leave it to cool for ten minutes, then roll it out about ⅛-inch thick. Wring the butter in a very clean cloth to extract any moisture, and be sure that it is firm and cool, or the paste will not rise properly. In summer the butter should be placed on ice for half an hour before it is used. Put the butter in the centre of the paste, which fold over as if making a dumpling, dredge a little flour on, and roll the paste out ⅛-inch thick, taking care that the butter does not break through. Fold the paste in three, and roll it out again, then put it on a floured dish, and
set it aside for half an hour in a cool place, or, in summer, on ice. Fold in three and roll it out, fold again and roll out, set aside for a quarter of an hour, then fold and roll out twice as before, and it is then ready for use.

No. 905.—PASTE (Flour and Water).

Ingredients—
1 lb. flour, ½ pint water.

Method—
Put the flour in a bowl, and mix it with sufficient cold water to make a stiff, smooth paste, using a wooden spoon to mix it with. Turn it on to a floured board, knead until quite smooth, roll out ½-inch thick, and use where directed. This is the paste used for marrow bones to prevent the marrow boiling out, and for many other purposes. The paste must be made rather stiff, and be well kneaded into a firm, close mass, or it will not fulfil its purpose.

No. 906.—PASTRY SANDWICHES.

Ingredients—
Crust No. 402, or No. 403, made with ½ lb. flour, and other ingredients in proportion, ½ lb. jam.

Method—
Divide the paste in two, roll out one portion into a square sheet less than ½-inch in thickness, lay it on a floured baking-sheet, spread the jam equally on it, roll out the rest of the crust, lay it on top, and press the edges together. Mark the paste into divisions 3½ inches long and 1 inch wide with the back of a knife, and bake the pastry 15 to 20 minutes, sift sugar on, divide where marked whilst still hot, pile the sandwiches, cross-barred, in a silver or glass dish, and serve cold.

Time — 15 to 20 minutes.
Sufficient for 4 or 5 persons.

No. 907.—PATTY CASES.

Ingredients—
Feuilletage paste No. 904, made with 1 lb. flour, and other ingredients in proportion, 1 egg.

Method—
Make the paste as directed, and roll it out quite 1 inch thick. Stamp out rounds with a cutter 2 inches in diameter, make a mark in the centre by pressing with a smaller cutter, beat and strain the egg, and brush each patty case over. Bake them in a rather quick oven, taking great care that they do not burn. When cooked, carefully cut out the small rounds marked with the cutter, and set them aside, then with the point of a small sharp knife remove the soft inside paste, leaving rather less than ½ inch thickness all the way round, and ½ inch at the bottom. When wanted for use, make the patty cases very hot in the oven, have ready the preparation also heated, fill the patty cases, replace their covers on the top, and serve.

The cuttings of this paste can be advantageously used for jam puffs or tartlets.

Time — To bake cases, 20 to 30 minutes.
Sufficient for 12 patty cases.

No. 989.—PRESERVING (Remarks on).

Fruit used for preserving must be picked on a dry day and very fresh. If the jam cannot be made the day the fruit is brought in, it should at least be stalked and put in a pan with the sugar in layers. It will then keep 24 hours with much less harm than if left untouched.

Jams must always be made in copper preserving-pan, and stirred with a wooden or silver spoon. Tin must
not be used, or it will spoil the colour of any red jam. It is impossible to give the exact time for boiling, the jam must be tried, and not considered done until a little poured on a plate sets. The jam, when potted and tied down, must be kept in a cool, dry place. The different kinds should be used more or less in rotation, so that if any jam shows signs of turning, it would be discovered quickly, and should then be re-boiled and consumed as soon as convenient. If this precaution were more generally taken, large quantities of jam would not be discovered unfit for use.

No. 992.—PUNCH (Remarks on).

All punches are obtained by the mixing of various spirits and liqueurs, with a sherbet of water, sugar, and lemon juice, flavoured with lemon peel.

It is essential to a punch that the mixture should be cooked, but no punch should ever be allowed to boil. For this reason it is always advisable to make punch in a bain-marie saucepan, so as to avoid the possibility of this happening. But though it is essential that the mixture should be cooked, it is important that the spirits and liqueurs should be left to simmer for as short a period as is necessary, for them to blend thoroughly with the sherbet and to become sufficiently hot. A general principle to be observed in punch-making should therefore be, to cook all the ingredients which go to make up the sherbet first, and only to add the spirits and liqueurs when these are thoroughly blended. Lemon peel is a flavouring used in almost all punches, but it should be used judiciously. It is better not to put shavings of the peel into the mixture, as is often done, because, if left in even for a short time, the flavour is apt to be too pronounced, and even bitter. The best plan is to rub one or two of the pieces of sugar to be used in the punch on the peel of one of the lemons. Quite enough flavour is obtained in this way, and there is no fear of the punch acquiring the bitter taste of over-soaked peel. Spices, if used at all, should be used very sparingly.

**No. 1041.**—**RISSOLES (à la Pompadour).**

**Ingredients**—
2 table-spoonfuls finely-minced game or chicken, 1 table-spoonful gravy, seasoning pepper and salt, crust No. 403, made with 2 oz. flour, and other ingredients in proportion, 1 egg, 1 table-spoonful vermicelli.
Method—

Mince the meat as finely as possible, mix it with the gravy, and season with pepper and salt. If you have a small piece of puff or short crust left over from making a pie or tart use it, otherwise make a very small quantity of paste, as directed above. Roll it out as thinly as possible, and cut it into 2-inch squares, which turn so as to form a diamond shape; place a small tea-spoonful of mince on one half, fold over the other, and press lightly round; then fold the edge daintily round, forming the rissoles into crescents; brush them over with the egg, beaten and strained; crush the vermicelli with the rolling pin, sprinkle a little over each, arrange them in a frying-basket, plunge them into boiling fat, and fry a delicate golden brown. Turn them on to kitchen paper to drain, and serve on a hot napkin, garnished with fried parsley.

There is often sufficient for this dish left on the bones of a chicken or pheasant before it is stewed down for gravy. The legs of a partridge or similar bird can also be advantageously used in this way.

Time—To fry, 5 or 6 minutes.

Sufficient for 8 or 9 rissoles.

No. 1042.—ROASTING (Remarks on).

The old-fashioned and excellent method of roasting before an open fire is now, unfortunately, almost obsolete. To obtain as good results with oven cookery as was formerly easily obtainable with an open range is by no means easy. The tendency of the hot, dry air of the oven is to dry and harden the outer portion of the joint, thus making it difficult for the heat to penetrate the inner parts. This can only be obviated by constant and thorough basting, and every cook should pay great attention to this point. Poultry and game should be covered with a sheet of buttered paper to protect the breast, and this should be removed about 10 minutes before the bird is served, to allow of the breast taking a nice colour. Good clarified dripping answers perfectly for the basting of all birds, butter is really an unnecessary extravagance. Dripping used for basting game will not be fit for use a second time, as it will have acquired too strong a “gamey” flavour to be pleasant. All birds are much improved by having a slice of fat bacon tied on the breast, this, of course, must be removed before they are sent to table.

No. 1043.—RUM PUNCH.

\( \frac{1}{2} \) bottle rum, \( \frac{1}{2} \) pint brandy, 1 liqueur-glass curaçao, 1 pint water, \( \frac{1}{4} \) pint lemon juice, 6 lumps sugar, lemon peel, Seville orange peel, a scrape of nutmeg.

Method—

Squeeze as many lemons into a tumbler as will produce \( \frac{1}{2} \) pint of juice. Rub 2 of the 6 lumps of sugar upon the rind of 1 of the lemons, and 2 more upon the rind of a Seville orange till they are yellowish with the expressed oil. Put the 6 lumps of sugar into the lemon juice. Pour the water, lemon juice, and sugar into a bain-marie saucepan; add a scrape of nutmeg, and let the mixture or sherbet simmer for a \( \frac{1}{4} \) of an hour; add the curaçao to the rum, mix in the brandy, and then stir them, not too fast, into the saucepan. Let the whole mixture simmer for a minute or two up to a temperature a little beyond drinking-point, and serve in small tumblers.

If the rum is very old and soft the brandy may be omitted, and the water reduced to \( \frac{3}{4} \) pint.

Sauces should never be made at the last minute, this occasions hurry; and a sauce, however simple, requires time and care. All wine sauces, gravies, and bread sauce can be prepared hours before they are required, and heated up in a bain-marie when wanted for table. If the necessary bain-maries are not at hand, pour the sauces into gaily pots, and stand these in a stewpan of boiling water.

One of the most necessary sauces to learn is the ordinary melted butter. This is the foundation of so many sauces, and is so constantly required that every cook should study one of the simple recipes given, and learn to make it perfectly.

White sauces should be of a nice creamy white, smooth and thick, and those intended to mask the meat with which they are served, such as caper sauce with mutton, and béchamel with fowl, should be sufficiently thick to really do so. Nothing looks more miserable than a chicken with a poor-looking sauce imperfectly covering its limbs.

Brown sauces should not be so thick as white sauces, but should lightly adhere to the spoon. Care must be taken to make them an appetising colour, by the addition of a few drops of browning, if necessary. Arrowroot is very much better than flour for thickening brown and wine sauces; it gives a clear transparency, instead of the raw dulness of flour. It should be used in very small quantities, and the flavour is then quite imperceptible, even to the most delicate palates. For most white sauces I prefer flour, and in my recipes will be found mentioned the thickening I have found most suitable.

The exact quantity of sauce to make is largely a matter of experience, and, of course, varies according to the individual tastes of families. Cooks are generally inclined to make a good deal more than is required, but it is as great a fault to have too little,
and a more irreparable one. One tablespoonful of sauce is usually enough to allow for each person, and 1 tablespoonful over; of bread sauce more is often liked. Bread sauce should be of a fair consistency, neither sloppy nor firm. In conclusion, I would suggest that when sauce is left at the table it should not too hastily be thrown away, as it can very often be advantageously in making rissoles, scallops, etc.

Sauce-boats should be most carefully heated, or the sauce will be cooled before it reaches the table. This is especially disagreeable in the case of white sauces, when a skin is likely to form on the top. Fill the sauce-boats with boiling water, and leave them for at least 10 minutes, only emptying them out immediately before the sauce is put in.

No. 1080.—SAVOURIES (Remarks on).

Savouries should be simple, and they should be savoury, not sweet, and certainly not both mixed together, as when anchovies are served with cream.

The idea of a savoury is to leave a clean taste in the mouth, and the materials should be chosen with that object in view. Anchovies, in various forms, provide a large choice, and soft roes on toast, cheese soufflés, or toasts and olives prepared in different ways will usually be found acceptable. The perfection of the savoury depends largely on the little croston which is used as a foundation, and too much care cannot be taken in its preparation.
Let your savouries be invariably hot.

No. 1107.—SOLES (Filleted, au Gratin).

Ingredients—
2 small soles, 1 oz. butter, seasoning pepper and salt, 2 tablespoonfuls breadcrumbs.

Method—
Fillet the soles, which will provide 8 fillets between them. Dip each fillet into the seasoning and breadcrumbs, and roll it up, tying a small piece of string round to secure the ends. Stand the rolls in a small baking-tin, divide the butter into 8 pieces, and put 1 on each fillet. Bake them in a gentle oven until tender, then take them up, cut off the string, and serve on a very hot dish, garnished with parsley and cut lemon. There
will be a little sauce from the fish, which should be poured round the fish.

Time—10 to 15 minutes.
Sufficient for 3 or 4 persons.

No. 1108.—SOLE (à la Meunière).

Ingredients—
1 sole, 1 tea-spoonful finely-minced onion, juice of 1 lemon, seasoning salt and cayenne.

Method—
Cleanse and skin the sole, and score it across on both sides, cutting nearly to the bone. Rub it with the salt and onion, flour it, and broil it over a clear fire for 3 or 4 minutes on each side. Then put the sole in a baking-dish, put the butter on it in small pieces, strain the lemon juice over it, season with a little salt and cayenne, and bake in a good oven for 3 minutes. Serve on a very hot dish, and strain the liquor from the tin round.

Time—10 or 12 minutes.
Sufficient for 1 or 2 persons.

Ingredients—
1 pair of soles, 1/2 pint shelled shrimps, 1 oz. butter, 1 dessert-spoonful breadcrumbs, seasoning salt and cayenne.

Method—
Fillet the soles, pound the shrimps in a mortar with 1 oz. butter and the breadcrumbs, and a seasoning of salt and a little cayenne; mix well, and spread a thin layer of the mixture on each fillet. Roll the fillets up neatly, and fix them with a metal skewer; egg and breadcrumb them carefully, and arrange them in a frying-basket. Plunge the basket into a saucepan of boiling fat, and fry the fillets a delicate golden-brown.

Time—7 or 8 minutes.
Sufficient for 3 or 4 persons.

1 pair of soles, 1/2 pint béchamel sauce No. 137, 1/2 pint green peas (cooked), seasoning pepper and salt.

Method—
Cleanse, wash, and fillet the soles, roll up the fillets neatly, and tie them with tape. Put the fillets into cold water, bring slowly to the boil, and boil them for 3 minutes. Drain them, and have ready the béchamel very hot; put in the fillets, and simmer them for 10 minutes, then add the peas, freshly boiled, season with pepper and salt, and mix well. Dish the fillets neatly, remove the tapes, pour the sauce over, and serve very hot.

Time—13 minutes.
Sufficient for 3 or 4 persons.

No. 1111.—SOUFFLÉ (Sweet).

Ingredients—
1 pint milk, 3 oz. fine flour, 1 1/2 oz. butter, 2 oz. pounded sugar, grated rind of 1/2 a lemon, 4 eggs.

Method—
Prepare a soufflé mould (an ordinary cake-tin will do) by buttering it inside, and fixing a band 5 or 6 inches deep of buttered paper round the top so as to protect the soufflé when it rises above the top of the tin. Mix the flour to a smooth batter with two or three spoonfuls of the milk. Heat the rest to boiling-point, and mix it gradually with the flour, stirring vigorously with a wooden spoon. Return the mixture to the saucepan and continue stirring
over a gentle fire for a few minutes until it is very thick. Then take the saucepan off and stir in the butter, sugar, lemon rind, and the beaten and strained yolks of the eggs. Whisk the whites to as stiff a froth as possible, mix them gently, but thoroughly, with the soufflé mixture, pour it into the tin, and bake it in a moderate oven. Do not open the door of the oven for 10 minutes after the soufflé is put in or it will not rise properly. Serve immediately it is taken out.

*Time*—30 to 40 minutes.

*Sufficient for 4 or 5 persons.*

No. 1112.—SOUPS (Remarks on).

Directions for soup wherever possible have been given for small quantities, as the ingredients can easily be doubled when more is required.

Many persons are under the impression that good soup cannot be made without fresh meat. If the recipes given are carefully followed, I think it will be found that this idea is a mistaken one, and that extremely palatable soups may be made of the bones and trimmings of joints, uncooked bones being especially valuable.

The principal points to be remembered are, to bring soup slowly to boiling point, and to *simmer* it gently, but continuously, for 4 or 5 hours, then immediately to strain off the stock through a fine sieve, and to set it aside until quite cold so that all the fat may be easily removed. If any fat is left in the stock, clearing is impossible. Sherry should be used only in small quantities. Clear soup is often served which tastes dangerously like hot sherry and water, and this is a most objectionable start to a dinner, and quite sufficient to spoil any one's appetite. Sherry of fairly good quality should be used. Raw, fiery "cooking sherry" is quite unsuitable, and the soup is much to be preferred without any wine at all.

Thick soups must be carefully passed through a fine sieve and heated afresh. They must be rich and thick, but not so solid as to set in the plate. Except for milk soups arrowroot is much too be preferred as thickening to flour. An ounce of butter stirred into vegetable soups just before serving greatly improves their flavour.

No. 1113.—SOUP (Good, from Bones).

*Ingredients—*

1 quart stock No. 1125, or No. 1126, 2 table-spoonfuls mushroom ketchup, 1 large tea-spoonful arrowroot, seasoning pepper and salt, few drops of browning.

*Method—*

Remove all the fat, and heat the stock to boiling point; mix the mushroom ketchup and arrowroot smoothly, and add them to the boiling stock, stirring well; simmer the stock for 5 or 6 minutes until the soup is slightly thickened and looks bright, season with pepper and salt; add a few drops of browning to improve the colour if necessary, and serve.

*Time*—5 or 6 minutes to finish soup.

*Sufficient for 3 or 4 persons.*

No. 1114.—SOUP (Clear).

*Ingredients—*

1 quart stock, No. 1127, whites and shells of 2 eggs, 2 table-spoonfuls sherry, seasoning pepper and salt.

*Method—*

Remove all the fat from the stock, and wash the top, with a very clean cloth wrung out of boiling water, to remove every particle of fat. Beat the whites and crushed shells of the eggs with ¼ pint cold stock; put them with the rest of the stock (carefully leaving behind all sediment) and the sherry in a saucepan, and heat to boiling point,
stirring occasionally. Let it simmer for 10 minutes, but do not stir again after boiling has commenced. Strain the soup through a jelly-bag, wrung out of boiling water, pouring through a second time what first runs out, should it not look bright and clear. Heat the soup afresh in a delicately clean saucepan, season with pepper and salt, and serve.

The bone stocks, No. 1125 and No. 1126, can also be cleared by this recipe, and though they will not look as bright, or taste quite so well, as clear soup from fresh meat, they are very palatable, and are useful as a change from the ordinary soup from bones.

Time—10 minutes to simmer stock.

**Sufficient for 3 or 4 persons.**

**No. 1122.—STEAK AND OYSTER PIE.**

**Ingredients**—

- 1½ lbs. rump steak, 18 oysters, 3 eggs, 1 table-spoonful flour, 1 tea-spoonful salt, \( \frac{1}{2} \) tea-spoonful ground black pepper, \( \frac{1}{4} \) pint stock or water, puff crust No. 400, made with \( \frac{3}{4} \) lb. flour, and other ingredients in proportion.

**Method**—

Open the oysters carefully, wash them in their own liquor, put them in a lined saucepan, strain the liquor over them, and heat them very gently to boiling point, but do not let them boil or they will be hard, then turn them into a basin and strain the liquor on to them. Boil 2 of the eggs for 10 minutes, lay them in cold water to cool, and shell them; have the steaks cut about 1 inch thick, slice them across the meat in \( \frac{4}{4} \) inch strips, and divide these into pieces 3 or 4 inches long. Mix the flour, pepper, and salt on a plate, dip each piece of steak into the mixture and roll it up. Have ready a pie-dish with a small cup or jar in the centre, fill the dish with the rolls of meat, and the oysters in alternate layers, slice the
eas, lay them round the edge, and pour in the oyster liquor and stock or water. Roll out the paste, cut a thin strip, and lay it round the edge of the dish, which must previously be moistened; roll out the cover, place it on top, and ornament the edges neatly. Beat and strain the egg, brush over the pie with it, and bake in a good oven, covering the top with a buttered paper as soon as it has taken a nice colour.

1½ lbs. rump steak, 18 oysters, 1 table-spoonful flour, 1 tea-spoonful salt, ¼ tea-spoonful ground black pepper, ½ pint stock or water, suet crust No. 404, made with 1 lb. flour, and other ingredients in proportion.

**Method**—

Open the oysters carefully, wash them in their own liquor, then put them in a lined saucepan, strain the liquor over them, and heat them very gently to boiling point (do not let them boil or the oysters will become hard), then turn them into a basin, and strain the liquor on them. Cut the steak into strips, 2 or 3 inches long and 2 inches broad, leaving a little fat on some of the pieces. Mix the flour, pepper, and salt on a plate. Line a buttered pudding-basin with the crust, dip each piece of steak in the seasoning, roll it up, and lay it in the basin, putting in 4 or 5 oysters between each layer of steak. Fill the pudding in this manner, pour in the oyster liquor and water, and sit in the cover of crust, pressing the edges together. Tie a floured cloth over the top, and plunge the pudding into plenty of boiling water. Be very careful not to let the pudding go off the boil until cooked, and fill up the saucepan from time to time with boiling water from the kettle, if necessary. When ready to serve, take off the cloth, pin a very clean napkin round the basin, and serve at once.

*Time*—10 minutes to plump the oysters.

4 hours to boil pudding.

*Sufficient for* 5 or 6 persons.

**No. 1124. STOCK (Remarks on):**

In every recipe for doing-up meat, it will be observed that stock is mentioned as preferable to water. It is better to use stock which is prepared rather than to make a hasty gravy from the trimmings of the meat to be done up. To have a sufficient supply for this, as well as for soup, necessitates some care and trouble, but is not necessarily a large expense. If the bones and trimmings of meat and game are carefully set aside and boiled down while fresh, with some good vegetables, a constant order for gravy meat from the butcher's can be easily avoided. Raw bones can also be substituted with good effect. The stock, however, must be freshly made, and poured off, and the saucepan cleaned out. The odious and dirty practice of adding good and fresh meat to the refuse of a week's stock-pot is as unwholesome as it is wasteful. The original stock has often become tainted, and the whole is spoilt. It should be a standing rule that the stock is never left a night in the stewpan; 5 or 6 hours' gentle simmering will draw out all the good from soup and vegetables, and they are then done with, and should be disposed of after the stock has been carefully strained off.

It should also be borne in mind that the stock-pot is not intended as a receptacle for every oddment the larder may furnish; pieces of bread, fat, etc., do not improve the flavour or quality of stock. On the other hand, much may
be done by a careful cook to improve the stock by materials at hand. The water in which a delicate-flavoured vegetable, such as asparagus, has been boiled, should be set aside in a clean basin, and used when cold, instead of plain water. Bones of game are valuable, however small, and should be used separately as a foundation for game gravy.

Melt the dripping in a stewpan; cut the bacon and onions in dice, and fry them for 5 or 6 minutes, taking care they do not burn; add the bones, and pour in the boiling water. Skim carefully, then put in the rest of the vegetables, cut in dice, and the seasoning. Simmer gently for 5 hours, skimming carefully from time to time. Carcass of 1 or 2 birds, 1 carrot, 1 onion, ½ oz. butter, sprig of parsley, 4 peppercorns, pinch of salt, 1½ pints water.
Method—
Remove the black, spongy substance from the inside of the bird or birds, as it would impart a bitter flavour to the stock. Cut each carcass in several pieces, melt the butter, cut the onion in dice, and fry it with all the bones and any trimmings that may be left for 3 or 4 minutes. Then add the carrot, cut in dice, parsley, pepper, salt, and water, and stew all gently for 1½ hours, skimming carefully from time to time. Strain through a fine sieve, and set aside to cool.

Time—10 minutes to brown meat.
5 hours to simmer stock.

No. 1130.—STRAWBERRY JAM.

Ingredients—
12 lbs. ripe strawberries, 6 lbs. preserving sugar, 1 oz. isinglass.

No. 1131.—STRAWBERRY JELLY.

Ingredients—
18 strawberries, 1 quart clear wine jelly No. 243, or No. 670.

Method—
Remove the stalks from the strawberries. Have a jelly-mould with 6 knobs, into each of which very gently press a strawberry, pour in a little jelly sufficient to form a setting for the fruit, and let set. When it is firm add more jelly to the depth of 1 inch. Let that set. Then lay in 4 or 5 strawberries, pour in a little more jelly, but very carefully, or the fruit will float out of the knobs. Add fruit and jelly alternately in this manner until the mould is full. The filling of the mould must be effected extremely gradually, or the fruit will not be evenly distributed throughout the jelly. Care must also be taken that the fruit is not placed too closely together or the jelly will appear dull and heavy when turned out. In warm weather it is almost imperative to keep the mould on ice, or the jelly will not be firm.
If ice cannot be obtained an extra ½ oz. of isinglass must be used.
Sufficient for 1-quart mould.
No. 1132.—STRAWBERRY TARTLETS.

Ingredients—

1 lb. strawberries, 3 oz. sugar, 1 pint water, 1 oz. isinglass, 1/2 tea-spoonful arrowroot, a few drops of cochineal. Crust No. 402 or No. 403, made with 1/2 lb. flour, and other ingredients in proportion.

Method—

Butter some patty-pans, line them with crust rolled very thin, decorate the edges neatly, put a small ball of flour and water in each to keep them in shape, and bake them in a hot oven about 15 minutes. Whilst they are cooking, remove the stalks from 1/4 lb. of the smallest of the strawberries, put them in a lined saucepan with the water, isinglass, and sugar, and simmer until the sugar and isinglass are dissolved. Mix the arrowroot with a spoonful of cold water, and add it to the syrup. Simmer all 3 or 4 minutes until it is slightly thickened and looks transparent, pressing the strawberries slightly against the sides of the saucepan to extract their juice; then strain into a small basin, and colour with cochineal. When the tartlets are done, take out the little balls of paste, and pile 5 or 6 of the uncooked strawberries in each, pour a spoonful of the strawberry syrup over them, and set them aside to cool. Serve cold.

Time—About 15 minutes to bake tartlets, 7 or 8 minutes to make syrup.

Sufficient for 12 tartlets.

No. 1140.—SWISS ROLL.

Ingredients—
3 eggs, 6 oz. pounded sugar, 3 oz. flour, \( \frac{1}{4} \) lb. apricot, raspberry, or greengage jam.
Method—
Break the eggs, separating the yolks and the whites, beat the yolks, first taking out the specks, and dredge in the sugar and the flour, beating all the time. Whisk the whites of the eggs to as stiff a froth as possible, and stir them gently to the mixture, butter a small baking-tin, and pour in the mixture, it should be about \(\frac{1}{4}\) inch thick, set it in a moderate oven, and bake 6 or 7 minutes. As soon as slightly firm, take it out, spread jam quickly over it, and roll it up, replace in the oven, and bake another 5 or 6 minutes, sift sugar on, and set aside to cool. Practice will only teach the cook the exact moment at which the cake is ready for rolling; it must not be allowed to get too firm, or it will break as it is rolled; it should be just set enough to handle and no more.

Bread made the day before.

Make a slit down the back to prevent the white surface from cracking, rub the fish over with lemon, place it in a very clean turbot-kettle, and cover it with cold water (salted). Bring it gradually to the boil, skim it carefully, and then simmer it gently until cooked, take it up, drain it very carefully, and dish on a very clean hot napkin, garnished with parsley and cut lemon. Sprinkle a little lobster coral over the fish, if lobster is used in making the sauce. Send lobster or shrimp sauce and melted butter to table.

No. 1181.—**VANILLA SOUFFLÉ.**

**Ingredients**—  
1 pint milk, 1 vanilla pod, 3 oz. fine flour, 1½ oz. butter, 1½ oz. sugar, 4 eggs.

**Method**—  
Prepare a soufflé mould by buttering it inside, and fixing a band, 5 or 6 inches deep, of buttered paper round the top, so as to protect the soufflé when it rises above the top of the tin. Mix the flour to a smooth batter with 2 or 3 spoonfuls of the milk. Put the vanilla pod, with the rest of the milk, into a lined saucepan, and let them heat slowly to boiling point. Leave it for 10 minutes, then take out the pod, stir in the flour gradually, and continue stirring over a gentle fire for a few minutes until it is very thick. Then take the saucepan off, and stir in the butter, sugar, and the beaten and strained yolks of the eggs. Whisk the whites to as stiff a froth as possible, mix them gently but thoroughly with the soufflé mixture, pour it into the tin, and bake in a moderate oven.

Do not open the oven door for 10 minutes after the soufflé is put in or it will not rise properly. Serve immediately it is taken out, with a clean napkin neatly pinned round the tin. The vanilla pod should be washed, dried, and placed in a tin for future use.  
**Time**—30 to 40 minutes.  
**Sufficient for 4 or 5 persons.

\( \frac{1}{4} \) pint sherry or port, 3 table-spoonfuls water, 1 oz. sugar, 1 small teaspoonful arrowroot, 1 dessert-spoonful brandy.

Method—

Put the wine, sugar, and water in a lined saucepan, and stir them until the sugar is melted. Mix the arrowroot smoothly with the brandy, and add them to the wine. Stir the sauce over a gentle fire until it thickens slightly, and looks clear and transparent, then strain it, and serve at once.

Time—Altogether, 7 or 8 minutes.

Sufficient for 4 or 5 persons.

No. 1220.—WOODCOCK (Roast).

Ingredients—

2 woodcock, 2 slices of toast, clarified dripping for basting, \( \frac{1}{2} \) pint of brown gravy.

Method—

Let the birds be plucked, but not drawn. Flour them, and place a slice of toast under each. Roast them in front of a clear fire or in a good oven, basting them continually. When nearly cooked dredge the breasts again with flour, and baste them until nicely frothed. Spread the trails over the pieces of toast, dish the birds upon them, pour a little of the gravy
round, and send the rest to table in a tureen.

*Time*—18 to 25 minutes.
*Sufficient for 3 or 4 persons.*

**No. 1221—WOODCOCK (Scotch).**

*Ingredients—*

4 small slices buttered toast, 8 anchovies or 1 table-spoonful anchovy paste, 2 eggs, 1 oz. butter, seasoning pepper and salt.

*Method—*

Cut the crust off the toast, and let the slices be rather larger than for anchovy toasts. Prepare the anchovies carefully, and put two on each slice of toast. Make them very hot in the oven. If anchovy paste is preferred, spread it neatly over the toast. Scramble the eggs with the butter by recipe No. 501, season them with pepper and salt, put a small spoonful on each of the toasts on top of the anchovies, and serve very hot.

*Time*—To heat the toasts, 7 or 8 minutes. To scramble eggs, 3 minutes.
*Sufficient for 3 or 4 persons.*

**No. 1222.—YORKSHIRE PUDDING.**

*Ingredients—*

2 table-spoonfuls flour, 2 eggs, ¾ pint milk, 1 pinch salt.

*Method—*

Beat and strain the eggs; add to them the milk, and mix part of these with the flour, very gradually, into a smooth paste; then add the rest of the milk and eggs and the salt, and beat the mixture for 3 or 4 minutes. Pour it into a well-greased tin, and bake in a good oven for 35 or 40 minutes. Cut it up into small, neat pieces, and serve in a small, hot dish.

*Time*—35 to 40 minutes.
*Sufficient for 4 or 5 persons.*
It's quite a HOME-MADE SOUP!

EDWARDS' DESICCATED SOUP

Made in 4 VARIETIES: Brown, White, Tomato, Gravina.

FOR THE TABLE.

If you like a good, tasty, HOME-MADE SOUP, you should use BROWN, WHITE, or TOMATO. They are made from home-grown vegetables and beef, and are simply delicious. Children thoroughly enjoy them, and we know of no soups at anything like their price which bear any comparison with them. For a trial you can get a PENNY PACKET of any respectable grocer, but the larger sizes are more economical.

FOR THE KITCHEN.

GRAVINA is particularly suited for enriching gravies, sauces, stews, rissoles, ragouts, minced collops, meat pies, hashes, etc., and indeed almost anything. It has an excellent flavour, and gives substance and piquancy wherever used. It is very handy and economical in all kinds of cookery. It is a perfect gravy in itself, without any addition. Try it, and you will be surprised.

If you cannot get the Soups, send to Fredk. King Sr. Co., Ltd., 3 Camomile Street, London, E.C., 8 penny stamps for an 8d. tin of Brown, White, or Tomato.

6 penny stamps for a 6d. tin of Gravina.
